**QUESTION 1**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You mount an image of Windows 10.

You download 10 Windows 10 update packages to separate folders. Some of the update packages contain dependencies to the other update packages. You are unaware of the specific dependencies.

You need to add all the update packages to the image in the correct order.

Solution: You copy all the updates to the same folder. You run `dism.exe/Add-Package` once and specify the `/PackagePath` parameter once.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

---

**QUESTION 2**

You have a server named Server1 that runs Windows Server 2016. Server1 is located on a network that is disconnected from the Internet.

You have a computer named Computer1 that runs Windows 10.

You download the Windows Assessment and Deployment Kit (Windows ADK) setup on Computer1.

You need to create an installation source on a USB drive that can be used to install Windows ADK on Server1.

Which installation option should you use when you run the Windows ADK setup on Computer1?

A. `/list`

B. `/layout`

C. `/ceip`

D. `/features`

E. /installpath

Correct Answer: B

---

### QUESTION 3

You plan to create an image of Windows 10 that contains a push-button reset solution. The solution will have custom settings for each edition of Windows 10.

You need to prepare the push-button reset solution.

What should you include in the solution?

- A. an unattended file and a bare metal recovery configuration
- B. an unattended file and extensibility scripts
- C. extensibility scripts and system restore points
- D. a bare metal recovery configuration and Scanstate packages

Correct Answer: B

---

### QUESTION 4

You have a generalized image of the 64-bit version of Windows 10. The image is released to the Out-of-Box-Experience (OOBE).

You need to ensure that when the image is deployed to a computer, the computer starts in audit mode.

What should you do?

- A. Create an answer file, and then copy the answer file to the image.
- B. When the computer starts, press SHIFT+F10, and then run sysprep.exe /audit.
- C. Create a provisioning package, and then copy the provisioning package to the image.
- D. When the computer starts, press SHIFT+F10, and then run imagex.exe.

Correct Answer: A

---

### QUESTION 5

You have a computer named Computer1.

You deploy an image of Windows 10 to Computer1. You start Computer1 in audit mode, and then you install several device drivers.

You need to capture an image of Computer1.

Which tool should you use?

- A. Windows System Image Manager (Windows SIM)
- B. dism.exe
- C. Express Deployment Tool (EDT) for Windows 10
- D. scanstate.exe

Correct Answer: B
