- ⚙ **365 Days** Free Update
- ⚙ **800,000+** Satisfied Customers

**QUESTION 1**

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

Start of repeated scenario You plan to use Azure platform tools to detect and analyze food items in smart refrigerators. To provide families with an integrated experience for grocery shopping and cooking, the refrigerators will connect to other smart appliances, such as

stoves and microwave ovens, on a LAN.

You plan to build an object recognition model by using the Microsoft Cognitive Toolkit. The object recognition model will receive input from the connected devices and send results to applications.

The training data will be derived from more than 10 TB of images. You will convert the raw images to the sparse format.

End of repeated scenario.

You need to ensure that a web service endpoint can receive image data and use an object recognition model to return the expected object and the confidence level of the model. The solution must minimize the effort required to generate the

client code to access the web service.

Which resource should you use?

- A. the edX Data Science Learning Dashboard
- B. Azure Machine Learning Studio
- C. Cortana Intelligence Gallery
- D. the Data Science Virtual Machine

Correct Answer: B

---

**QUESTION 2**

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You process some data by using Azure Machine Learning Studio. You have an intermediate dataset. The dataset has a column that contains date values stored in a format of MM/DD/YYYY.

You need to split the column into three separate columns by year, month, and day.

Which module should you use?

- A. Edit Metadata
- B. Normalize Data

- C. Clean Missing Data
- D. Import Data
- E. Execute Python Script
- F. Clip Values
- G. Clip Values
- H. Execute Python Script

Correct Answer: A

---

### QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are designing an Azure Machine Learning workflow.

You have a dataset that contains two million large digital photographs.

You plan to detect the presence of trees in the photographs.

You need to ensure that your model supports the following:

Solution: You create an Azure notebook that supports the Microsoft Cognitive Toolkit.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

---

### QUESTION 4

You need to integrate code and formatted text into an Azure Machine Learning experiment that enables interactive execution. What should you use?

- A. a Jupyter notebook
- B. Azure Stream Analytics
- C. an Execute Python Script module

D. an Execute R Script module

Correct Answer: A

## QUESTION 5

### DRAG DROP

You work for a company that has retail department stores.

You are developing an Azure Machine Learning experiment to predict seasonal sales. You need to address a model overfitting issue by using the following two solutions:

Solution 1: Controls the penalty for complexity, which, when successful, prevents overfitting  
Solution 2: Separates model selection from testing, causing a more conservative estimate of generalization

Which method should you use for each solution? To answer, drag the appropriate methods to the correct solutions. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Methods	Answer Area
<div>Cross-validation</div> <div>Generalization</div> <div>Normalization</div> <div>Regularization</div>	<div>Solution 1: <div>Method</div></div> <div>Solution 2: <div>Method</div></div>

Correct Answer:

Methods	Answer Area
<div>Cross-validation</div> <div>Generalization</div> <div>Normalization</div> <div>Regularization</div>	<div>Solution 1: <div>Cross-validation</div></div> <div>Solution 2: <div>Cross-validation</div></div>
