### QUESTION 1

You have an Azure HDInsight cluster.

You need to build a solution to ingest real-time streaming data into a nonrelational distributed database.

What should you use to build the solution?

- A. Apache Hive and Apache Kafka
- B. Spark and Phoenix
- C. Apache Storm and Apache HBase
- D. Apache Pig and Apache HCatalog

Correct Answer: C

<http://storm.apache.org/> <http://hbase.apache.org/>

---

### QUESTION 2

You have an Apache HBase cluster in Azure HDInsight. The cluster has a table named sales that contains a column family named customerfamily.

You need to add a new column family named customeraddr to the sales table.

How should you complete the command? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

**Values**

alter
customeraddr
disable
enable
create
customerfamily
drop

**Answer area**

```
Hbase > Value 'sales'
Hbase > Value 'sales'
, Value ',
{NAME=> Value ',
IN_MEMORY => 'false' }
Hbase > Value 'sales'
```

Correct Answer:

**Values**

create
drop

**Answer area**

```
Hbase > disable 'sales'
Hbase > alter 'sales'
, customerfamily ',
{NAME=> customeraddr ',
IN_MEMORY => 'false' }
Hbase > enable 'sales'
```

**QUESTION 3**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are building a security tracking solution in Apache Kafka to parse security logs. The security logs record an entry each time a user attempts to access an application. Each log entry contains the IP address used to make the attempt and

the country from which the attempt originated.

You need to receive notifications when an IP address from outside of the United States is used to access the application. Solution: Create new topics. Create a file import process to send messages. Start the consumer and run the producer. Does this meet the goal?

A. Yes

B. No

Correct Answer: A

---

#### QUESTION 4

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You need to deploy an enterprise data warehouse that will support in-memory analytics. The data warehouse must support connections that use the Microsoft Hive ODBC Driver and Beeline. The data warehouse will be managed by using Apache Amrabi only.

What should you do?

A. Use an Azure PowerShell script to create and configure a premium HDInsight cluster. Specify Apache Hadoop as the cluster type and use Linux as the operating system.

B. Use the Azure portal to create a standard HDInsight cluster. Specify Apache Spark as the cluster type and use Linux as the operating system.

C. Use an Azure PowerShell script to create a standard HDInsight cluster. Specify Apache HBase as the cluster type and use Windows as the operating system.

D. Use an Azure PowerShell script to create a standard HDInsight cluster. Specify Apache Storm as the cluster type and use Windows as the operating system.

E. Use an Azure PowerShell script to create a premium HDInsight cluster. Specify Apache HBase as the cluster type and use Linux as the operating system.

F. Use an Azure portal to create a standard HDInsight cluster. Specify Apache Interactive Hive as the cluster type and use Linux as the operating system.

G. Use an Azure portal to create a standard HDInsight cluster. Specify Apache HBase as the cluster type and use Linux as the operating system.

Correct Answer: F

References: <https://docs.microsoft.com/en-us/azure/hdinsight/hdinsight-hadoop-use-interactive-hive>

## QUESTION 5

You have a domain-joined Azure HDInsight cluster.

You plan to assign permissions to several support staff.

You need to assign roles to the staff so that they can perform specific tasks. The solution must use the principle of least privilege.

Which role should you assign for each task? To answer, drag the appropriate roles to the correct targets. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

### Roles

Cluster Administrator  
Cluster Operator  
Cluster User  
Service Administrator  
Service Operator

### Answer Area

#### Task

Configure services  
View service-level alerts:  
View cluster configurations:
