**QUESTION 1**

You have a domain-joined Apache Hadoop cluster in Azure HDInsight named hdcluster.

The Linux account for hdcluster is named Inxuser.

Your Active Directory account is named user1@fabrikam.com.

You need to run Hadoop commands from an SSH session.

Which credentials should you use? To answer, drag the appropriate credentials to the correct commands. Each credential may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.

NOTE: Each correct selection is worth one point.

Select and Place:

Credentials

Inxuser@hdcluster

Inxuser@hdcluster-ssh.azurehdinsight.net

user1@fabrikam.com

user1@fabrikam.com.hdinsight.net

Answer Area

SSH:

Credential

Knit

Credential

Correct Answer:

Credentials

Inxuser@hdcluster-ssh.azurehdinsight.net

user1@fabrikam.com.hdinsight.net

Answer Area

SSH:

Inxuser@hdcluster

Knit

user1@fabrikam.com

QUESTION 2

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You need to deploy a NoSQL database to an HDInsight cluster. You will manage the server that host the database by using Remote Desktop. The database must use the key/value pair format in a columnar model.

What should you do?

- A. Use an Azure PowerShell script to create and configure a premium HDInsight cluster. Specify Apache Hadoop as the cluster type and use Linux as the operating system.
- B. Use the Azure portal to create a standard HDInsight cluster. Specify Apache Spark as the cluster type and use Linux as the operating system.
- C. Use an Azure PowerShell script to create a standard HDInsight cluster. Specify Apache HBase as the cluster type and use Windows as the operating system.
- D. Use an Azure PowerShell script to create a standard HDInsight cluster. Specify Apache Storm as the cluster type and use Windows as the operating system.
- E. Use an Azure PowerShell script to create a premium HDInsight cluster. Specify Apache HBase as the cluster type and use Linux as the operating system.
- F. Use an Azure portal to create a standard HDInsight cluster. Specify Apache Interactive Hive as the cluster type and use Linux as the operating system.
- G. Use an Azure portal to create a standard HDInsight cluster. Specify Apache HBase as the cluster type and use Linux as the operating system.

Correct Answer: G

QUESTION 3

You have an Apache Spark cluster in Azure HDInsight. You execute the following command.

```
%spark
import org.apache.spark.sql.hive.orc._
import org.apache.spark.sql._
```

What is the result of running the command?

- A. the Hive ORC library is imported to Spark and external tables in ORC format are created
- B. the Spark library is imported and the data is loaded to an Apache Hive table
- C. the Hive ORC library is imported to Spark and the ORC-formatted data stored in Apache Hive tables becomes

accessible

D. the Spark library is imported and Scala functions are executed

Correct Answer: C

QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are building a security tracking solution in Apache Kafka to parse security logs. The security logs record an entry each time a user attempts to access an application. Each log entry contains the IP address used to make the attempt and

the country from which the attempt originated.

You need to receive notifications when an IP address from outside of the United States is used to access the application.

Solution: Create two new brokers. Create a file import process to send messages. Run the producer.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 5

You are configuring the Hive views on an Azure HDInsight cluster that is configured to use Kerberos.

You plan to use the YARN logs to troubleshoot a query that runs against Apache Hadoop.

You need to view the method, the service, and the authenticated account used to run the query.

Which method call should you view in the YARN logs?

A. HQL

B. WebHDFS

C. HDFS C* API

D. Ambari RESR API

Correct Answer: D
