The data model is shown in the Data Model exhibit. Data Model

The tables in the model contain the following data:

DailyRepairs has a log of hours and revenue for each day, workshop, and repair type. Every day, a log entry is created for each workshop, even if no hours or revenue are recorded for that day. Total Hours and Total Revenue are two measures denned in DailyRepairs. Total Hours sums the Hours column, and Total Revenue sums the Revenue column.

Workshops has a list of all the workshops and the current and previous workshop managers. The format of the Workshop Manager column is always FirstnameLastname. A value of 1 in the IsLatest column indicates that the workshop

manager listed in the record is the current workshop manager.

RepairTypes has a list of all the repair types.

Dates has a list of dates from 2015 to 2018.

End of repeated scenario.

You need to create a PivotChart that displays the month, the hours of the month, and the hours of the previous month, as shown in the following exhibit.

| Row Labels | Total Hours | Total Hours Last Month |
