### QUESTION 1

You plan to allow users to run internal applications from outside the company's network. You have a Windows Server 2012 R2 that has the Active Directory Federation Services (AD FS) role installed. You must secure onpremises

resources by using multifactor authentication (MFA). You need to design a solution to enforce different access levels for users with personal Windows S.I or iOS S devices.

Solution: You install a local instance of MFA Server and connect it to your Microsoft Azure MFA provider. Then, you use the Workplace Join process to configure access for personal devices to the onpremises resources.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

### QUESTION 2

Your network contains an Active Directory domain named contoso.com. The domain contains a Microsoft System Center 2012 infrastructure.

You deploy a service named Service1 by using a service template. Service1 contains two virtual machines. The virtual machines are configured as shown in the following table.

Virtual machine name	Roles and software
VM1	Web server Windows Server 2012 R2 Operations Manager agent Configuration Manager agent
VM2	Windows Server 2012 R2 Operations Manager agent Microsoft SQL Server 2012 Configuration Manager agent

You need to recommend a monitoring solution to ensure that an administrator can review the availability information of Service1.

Solution: From Configuration Manager, you create a Collection and a Desired Configuration Management baseline.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

### QUESTION 3

You need to implement the network Unlock feature to meet the BitLocker requirements.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

#### Actions

Create the Network Unlock certificate.

Deploy the private key and certificate to the Windows Deployment Server.

Configure a Group Policy in contoso.com for Network Unlock.

Install Windows Deployment Services on a new server in the contoso.com domain.

#### Answer Area

Select and Place:

#### Actions

Create the Network Unlock certificate.

Deploy the private key and certificate to the Windows Deployment Server.

Configure a Group Policy in contoso.com for Network Unlock.

Install Windows Deployment Services on a new server in the contoso.com domain.

#### Answer Area

Correct Answer:

**Actions**

**Answer Area**

Install Windows Deployment Services on a new server in the contoso.com domain.

Create the Network Unlock certificate.

Deploy the private key and certificate to the Windows Deployment Server.

Configure a Group Policy in contoso.com for Network Unlock.

**QUESTION 4**

DRAG DROP You must configure the replication of credentials of the user for the area of Great Britain. What three steps will guide you in order from? (The available actions are shown in the picture. Click the Drawing button and assign the necessary three steps in the proper order at)

Select and Place:

- Insert the Password Replication Policy, the existing accounts, and configure the access level with Deny
- Use the credentials of the Domain Admins and open the Active Directory; Snap-In Domains and Trusts.
- Use the credentials of the Domain Admins and open the Active Directory Snap-In Users and Computers.
- Configure on EF - DC , the properties of the account of LON - DC-01
- Configure on LON - DC-01, the properties of the account of EF - DC .
- Insert the Password Replication Policy, the existing accounts , and configure the access level with Allow

**Answer Area**

Correct Answer:

Insert the Password Replication Policy, the existing accounts, and configure the access level with Deny

Use the credentials of the Domain Admins and open the Active Directory Snap-In Domains and Trusts.

Configure on EF - DC , the properties of the account of LON - DC-01

**Answer Area**

Use the credentials of the Domain Admins and open the Active Directory Snap In Users and Computers.

Configure on LON - DC-01, the properties of the account of EF - DC -

Insert the Password Replication Policy, the existing accounts , and configure the access level with Allow.

**QUESTION 5**

You need to recommend a Group Policy strategy to support the company's planned changes. What should you include in the recommendation?

- A. Link a Group Policy object (GPO) to the AllComputers OU in each domain.
- B. Link a Group Policy object (GPO) to litwareinc.com and configure filtering.
- C. Link a Group Policy object (GPO) to each domain.
- D. Link a Group Policy object (GPO) to the Boston site.

Correct Answer: D
