**QUESTION 1**

You need to ensure that the members of Adatum\ResearchManagers have priority to the system resources on the RD Session Host servers. The solution must meet the technical requirements. What should you do?

- A. On the RD Session Host servers, configure the Fair Share CPU Scheduling settings.
- B. On the RD Connection Broker servers, configure the collection properties.
- C. On the RD Session Host servers, install and configure the Windows System Resource Manager feature.
- D. On the RD Session Host servers, install and configure the Windows Process Activation Service feature.

Correct Answer: C

QUESTION 2

Your network contains an Active Directory domain named contoso.com. The domain has Remote Desktop Services (RDS) deployed. The deployment contains two Remote Desktop Web Access (RD Web Access) servers named Server1 and

Server2.

You need to implement a solution to ensure that users can access RD Web Access if a single RD Web Access server fails.

Which solution should you implement? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Multipath I/O (MPIO)
- B. Network Load Balancing (NLB)
- C. Failover Clustering
- D. DNS round robin

Correct Answer: B

<http://blogs.technet.com/b/marobbin2/archive/2012/10/10/configuring-a-windows-2012-rdg-nlb-cluster.aspx>

QUESTION 3

Your company plans to deploy a Microsoft Application Visualization (App-V) 5.0 infrastructure.

You need to recommend a strategy to ensure that you can manage the App-V 5.0 infrastructure if a single management server fails.

What should you include in the recommendation?

More than one answer choice may achieve the goal. Select the BEST answer.

- A. Failover Clustering
- B. Database mirroring
- C. Network Load Balancing (NLB)
- D. DNS round robin

Correct Answer: C

QUESTION 4

You need to recommend an application deployment method for App2 that meets the application requirements. Which method should you recommend?

- A. Group Policy software installation.
- B. A RemoteApp program.
- C. A Microsoft Application Virtualization (App-V) package.
- D. A Client Hyper-V virtual machine.

Correct Answer: B

App-V maintains local resources on the client whereas RemoteApp utilizes resources on the backend RDS Server.

The network data sent to the client is also different, App-V has two feature packs that contain all binaries of the streamed app. Remote Apps utilizes RDP, so only the picture information, mouse, keyboard etc are transmitted.

Actually they can be combined, applications can be streamed to a RDS server and published to the client via RemoteApp. For more information, please see

<http://blogs.msdn.com/b/rds/archive/2009/10/14/whitepaperrelease-applicationvirtualization-4-5-for-terminal-services.aspx>

For more information about App-V, I suggest that you post to the App-V forum:

<http://social.technet.microsoft.com/Forums/en-US/category/appvirtualization>

Hope the information is helpful for your work.

QUESTION 5

You need to implement an RDS infrastructure to meet the technical requirements. What should you do first?

- A. Install Microsoft SQL Server 2008 R2.
- B. Install the Failover Clustering feature.
- C. Install the Windows Internal Database feature.

D. Install the Network Load Balancing (NLB) feature.

Correct Answer: D
