**QUESTION 1**

A technician is installing a new Communication Server (CS) 1000E RIs. 7x system for a customer. The requirements include installation of IP telephones for a small group of inside sales people. The telephones have been configured and are ready to be registered.

Which two items are to be entered when performing the IP telephone registration? (Choose two)

- A. The Directory Number
- B. The Node ID
- C. The Terminal Number
- D. The Customer Number

Correct Answer: BC

QUESTION 2

A customer with a Communication Server (CS) 1000E 5.5 HA system with IPMG systems and dual ISP 1100 signaling Servers is upgrading their system to release 7x. The ISP 100 Signaling Servers are being replaced with CPDC servers. The contents of the upgrade kit have been installed and the maintenance terminal connection has been established.

What are three other upgrades tasks to be completed? (Choose three)

- A. Insert a large system security device.
- B. Insert the bootable media into the faceplate.
- C. Connect the card to the TLAN/ELAN subnets.
- D. Place the CPDC card into an empty card slot.

Correct Answer: ABC

QUESTION 3

A technician is planning an upgrade for a customer's Communication Server (CS) 1000E Release 6.0 system to Release 7x.

Which two features are now to the Release 7x Deployment manager? (Choose two)

- A. Pre-configuration Remote Installation
- B. Auto-select servers to which applications can be deployed
- C. One-Touch System Upgrade
- D. Auto-Select of the correct application file

Correct Answer: AC

QUESTION 4

A technician is upgrading an option 11C Rls. 5x to a communication server 1000E SA Rls. 7x based on a CPPM CS, COTS SS with 4 chassis media gateway (MG), 100IP sets, 124 digital sets, 30 analog sets and one PR12 DID connection for the incoming and outgoing calls cannot be made from all type of the sets except for the sets in MG3.

When the technician is finished with the upgrade it is noticed during the acceptance testing that outgoing calls cannot be made from all type of the sets except for the sets in mG3. All the sets have dial tone.

Which statement describes what is causing this issue?

- A. The PR 12 loop disabled in MG3
- B. The DB 128 is not installed in MG3
- C. The COTS Signaling Server is faulty
- D. All MGs are unregistered except MG3

Correct Answer: D

QUESTION 5

A customer has a Communication Server (CS) 1000 Rls. 7x Co-Resident system, and needs to access the Call Server Overlay Shell to use the Call Server Overlay commands.

Which two commands are used to access the Call Server Shell? (Choose two)

- A. cspdt
- B. cslogin
- C. csaccess
- D. csconsole

Correct Answer: BD
