**QUESTION 1**

A customer with a Communication Server (CS) 1000RIs. 6.0 SA is upgrading to Release 7.0. They have decided to replace the existing CPPM Call server CPPM Signaling Server with a CPPM Co- Resident Call Server, Signaling Server and Gateway Controller to free up a two card slots. A technician has decided to use the ELAN IP of the Call Server from the original system as the ELAN IP address of the Co-Resident server.

Which action must be taken to consolidate the servers?

- A. Re-configure the Call Server IP address field in each Media gateway Controller
- B. Re-configure the Telephony Node Information to reflect the Call Server ELAN IP
- C. Re-configure the DSP Daughterboards to reflect Call Server ELAN IP.
- D. Re-configure the network Routing Service to reflect the Call Server ELAN IP address.

Correct Answer: A

QUESTION 2

A customer with a Communication Server (CS) 1000E RIs..5.5 with two IPMGs is upgrading their system to release 7 x. The Upgrade system will have two IP media Gateways.

Which two statements are true regarding DSP resources for the IP Media gateways in the Upgrade System? (Choose two)

- A. DSP resources are no longer required for inter-IOMG calls.
- B. DSP resources are localized to particular IPMG where the DSP resource is locted.
- C. DSP resources are considered system resources and are not localized.
- D. DSP resources are required for TDM to local calls

Correct Answer: BC

QUESTION 3

A customer with an existing Option 11C RIs. 5.5 chassis system plans to upgrade to a Communication Server (CS) 1000E RIs. 7x Standard Availability with a single IP Media Gateway (MG) 1000E chassis.

To complete the upgrade, which component in the Option 11C must be replaced?

- A. SSC Card
- B. Call Processor
- C. Media Gateway
- D. Digital Line Card

Correct Answer: A

QUESTION 4

You customer just installed three Communication Servers 1000 RIs. 7x systems to support their new campus distributed corporate offices. The customer allowed for periodic synchronization of their corporate Lightweight Directory Access Protocol (LDAP) database with subscriber Manager.

Which Subscriber Manager Feature allows you to synchronize subscribers from an LDAP database and assign them to a telephone account of the same time?

- A. Bulk Account Creation
- B. CSV Subscriber Synchronization
- C. Account Synchronization
- D. Flow-through Provisioning

Correct Answer: D

QUESTION 5

A customer is adding a new Avaya Communication Server (CS) 1000E RIs. 7x server within their existing release 7x network. The CPMG based server will become member server within an existing CS 1000 RIs. 7.0x security domain.

Which statement describes the process you should use to simultaneously install Linux Base and deploy application to the CPMG Co-Resident server?

- A. Log into the System Manager and select UCM Services to access the LCM and access the Base Manager of the Primary Security server to deploy applications.
- B. Log into the Base Manager and access local Deployment Manager to deploy applications
- C. Login to system Manager and select UCM Services to access UCM, access central Deployment Manager, pre-deploy the CPMG, and initiate the deployment locally by choosing to use Network file Service during boot up.
- D. Login to System Manager and select UCM Services to access UCM, access central Deployment Manager to deploy Linux Base OS and CS 1000 application using network file Service.

Correct Answer: D
