QUESTION 5

Which statement about how Avaya Aura Session Manager (SM) 8.x installs an Authentication file is true?

- A. It uses the Avaya Aura System Manager (SMGR) web GUI to install the authentication file from the SM Dashboard.
- B. It does not install the authentication file because it is no longer required in Aura 8.x.
- C. It transfers the authentication file to SM using FTP and execute the loadauth-I .
- D. It transfers the authentication file to SM using SFTP and execute the loadpwd-I .

Correct Answer: D

Installing an authentication file

Procedure

1. Log in to Session Manager using putty or other ssh tool.
2. Load the authentication file manually using `loadpwd` command as shown below:

```
loadpwd -l <path to the auth file> using craft or the customer account.
```
