**QUESTION 1**

In the context of Avaya Aura Presence Services 7.x, what is a Fetcher?

A. It is a kind of watcher that requests a one-time view of the user\'s current presentity information, but does not get future presentity information for a user.

B. It is a user whose devices are sending status or presentity information on his behalf using a Publish message regarding his communication status.

C. It is a watcher that is subscribing to current and future presentity information from another user.

D. It is the presence information about a user that the system reports.

Correct Answer: A

Fetchers pull the value of presence information for a specific presentity from the presence service. If a fetcher is fetching information on a regular basis, it is called a poller. Subscribers, on the other hand, subscribe to presentity information on the presence service.

**QUESTION 2**

Which configuration must be completed before configuring a TSAPI link on Avaya Aura Application Enablement Services (AES)?

A. A CTI link must be configured on Avaya Aura Communication Manager (CM) first.

B. A Switch Connection must be configured on Avaya Aura Application Enablement Services (AES) first.

C. A signaling-group must be configured on Avaya Aura Communication Manager (CM) first.

D. A CTI-user must be configured on Avaya Aura Application Enablement Services (AES) first.

Correct Answer: A

If you are administering the AE Server for TSAPI, JTAPI, DMCC with Call Control, Telephony Web Service,

or an AE Services integration (Microsoft or IBM Sametime), you must administer a CTI link from

Communication Manager to AE Services.

Follow these steps from a Communication Manager SAT to administer a CTI link type ADJ-IP.

Procedure

1.

Type add cti-link , for example add cti-link 5.

2.

Complete the CTI LINK form as follows:

a.

In the Extension field, type , for example 70001.

b.

In the Type field, type ADJ-IP.

c.

In the Name field, type , for example aeserver1. References: Avaya Aura Application Enablement Services Administration and Maintenance, page 30 Guide https://downloads.avaya.com/css/P8/documents/100171737

**QUESTION 3**

You need to connect Avaya BreezeTM platform that is hosting Avaya Aura Presence Services Snap-in with Avaya Aura Session Manager (SM).

Which three are needed? (Choose three.)

A. ports UDP 5060 and TLS 5061

B. one Entity Link from SM to Avaya Aura Presence Services Snap-in

C. one Entity Link from SM to Avaya BreezeTM

D. TLS 5061 and TLS 5062

E. ports TCP 5060 and UDP 5060

Correct Answer: BCD

BD: Administering Entity Link between Presence Services Cluster SIP Entity and Session Manager Procedure

1.

On the System Manager web console, navigate to Elements > Routing > Entity Links.

2.

In the Name field, enter a name for Entity Link.

3.

In the SIP Entity 1 field, select the Session Manager instance.

4.

In the Protocol field, select TLS.

5.

In the Port field, type 5062. Note: Note that this port number cannot be the same as the port number administered in "Administering Entity Link between Avaya Breeze and Session Manager". CD: Administering Entity Link between Avaya Breeze and Session Manager. About this task Create an En2tity Link to connect Session Manager to Avaya Breeze.

You must administer separate Entity Links for Avaya Breeze servers in order to open SIP listeners on the designated ports. Session Manager requires a Listen Port with the Listen Port as 5061, Protocol as TLS, and Default Domain as the login domain of endpoint devices. Without this, PPM will fail for SIP endpoints. **QUESTION 4**

How many Server Flows and/or Subscriber Flows are required for SIP Trunking?

A. one Subscriber Flow and two Server Flows

B. a minimum of two Subscriber Flows

C. one Subscriber Flow and one Server Flow

D. a minimum of two Server Flows

Correct Answer: A

Two types of flows need to be defined for the proper routing of SIP messages from and to the endpoints

and the SIP server.

Example, Server Flows:

**QUESTION 5**

In Avaya Session Border Controller for Enterprise (SBCE) 7.x, which two configuration screens must be configured for Personal Profile Management (PPM) to be successfully downloaded to an Avaya SIP Telephone (AST)? (Choose two.)

A. PPM Services Mapping Profile

B. Application Relay C. File Transfer

D. Reverse Proxy

Correct Answer: AB

B: Application relays function as port forwards. Different clients require different application relays.

A: An Avaya SIP phone downloads and processes a configuration file, sends out a slew of SUBSCRIBE messages, and uses something called Personal Profile Manager (PPM). Note: The PPM is a software module that runs as part of an Avaya Session Manager. It consists of a series of web services that phones use to retrieve and manage SIP related user data.
