QUESTION 1

You need to access an HTML table on an ASP.NET page from the code-behind file. Which two properties must you assign a value to? (Each correct answer presents part of the solution. Choose two.)

- A. name
- B. id
- C. runat
- D. runas

Correct Answer: BC

QUESTION 2

You create a website to share photographs with friends. The Web.config file for the website contains the following markup:

```
<configuration>
  <system.web>
    <authentication mode="Forms">
      <forms name="MyApp" loginUrl="/login.aspx"/>
    </authentication>
    <authorization>
      <allow roles="Administrators" />
      <deny users="*" />
    </authorization>
  </system.web>
</configuration>
```

You need to evaluate security for the website.

Instructions: Use the drop-down menus to select the answer choice that completes each statement. Each correct selection is worth one point.

Hot Area:

Answer Area

[answer choice] will be granted access to the site.

<input type="text"/>
Administrators only
Administrators and anonymous users
Administrators and authenticated users
Authenticated users only

[answer choice] will be redirected to the Login.aspx page.

<input type="text"/>
Administrators only
Anonymous users only
Administrators and anonymous users
Authenticated users only

Correct Answer:

Answer Area

[answer choice] will be granted access to the site.

Administrators only
Administrators and anonymous users
Administrators and authenticated users
Authenticated users only

[answer choice] will be redirected to the Login.aspx page.

Administrators only
Anonymous users only
Administrators and anonymous users
Authenticated users only

QUESTION 3
