### QUESTION 1

Your parents want you to help them protect a tax return file that is on their computer. You use BitLocker to encrypt the hard drive that contains the file. You then make a backup copy of the file. What will occur if you attempt to copy the backup copy to a USB flash drive?

- A. The backup copy will remain encrypted
- B. BitLocker will encrypt the USB flash drive
- C. BitLocker will prevent you from moving the file
- D. The backup copy will be decrypted

Correct Answer: A

**QUESTION 4**

Your sister is taking a video editing class at school. She purchased a 2-TB USB hard drive to store video files. She wants to connect it to her Windows 8.1 computer at home and to a Mac OSX 10.3 computer at school. Video file will exceed 5

GB in size.

You need to prepare a new hard drive by formatting it with the appropriate file system.

Which file system should you choose?

- A. FAT
- B. ReFS
- C. NTFS
- D. FAT32

Correct Answer: C

Mac OSX 10.3 supports NTFS.

NTFS supports large files well above 5 GB.

Incorrect answers:

Not A: FAT does not support a 5 GB file size.

Not B: ReFS is only supported by Microsoft Windows.

Not C:

Not D: FAT32 works fine if file sizes are smaller than 4GB.

---

**QUESTION 5**

When you copy a file from one NTFS file system partition to a different NTFS partition, what happens to the file permissions of the copied file?

- A. They are the combined permissions of the original file and destination folder
- B. They inherit the permissions of the destination folder
- C. They remain the same as the original
- D. They most restrictive permissions are applied

Correct Answer: B

References: <https://support.microsoft.com/en-us/help/320246/inherited-permissions-are-not-automatically-updated-when-you-move-fold>
