**QUESTION 1**

Your network is configured as an Active Directory Domain Services (AD DS) domain. The company has an Azure AD premium subscription. You need to configure file access and storage to meet the following requirements: Users can access files from any location with any managed devices without connecting to the corporate network.

Users can access local copies of files when they are not connected to the Internet.

Files will sync automatically when connected to the Internet.

What should you configure?

- A. Work Folders
- B. Offline folders
- C. Company Portal
- D. RemoteApp

Correct Answer: A

**QUESTION 2**

This question requires that you evaluate the underlined text to determine if it is correct.

You manage Windows 8.1 desktop and laptop computers in your university\\'s computer lab.

The university\\'s IT team recently implemented an active directory environment.

You need to join the desktop and laptop computers to a new Active Directory domain.

You should use the "Network and Internet" Control Panel applet to achieve this goal.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. User Accounts
- C. Administrative Tools
- D. System

Correct Answer: D

Join a domain, workgroup, or homegroup

1.

Open System by swiping in from the right edge of the screen, tapping Search (or if you're using a mouse, pointing to the upper-right corner of the screen, moving the mouse pointer down, and then clicking Search), entering System in the search box, and tapping or clicking System.

2.

Under Computer name, domain, and workgroup settings, click Change settings. You might be asked for an admin password or to confirm your choice.

3.

Click Network ID and follow the steps on your screen.

### QUESTION 3

You perform a bare metal installation of Microsoft Windows 10 Enterprise on a new computer. The computer has a single 1 TB hard disk that you configure as a single partition. Which file system should you use to format the disk partition?

- A. NTFS
- B. ReFS
- C. FAT32
- D. exFAT

Correct Answer: A

---

### QUESTION 4

You have an external monitor connected to a laptop computer that is running Windows 10. The monitors are configured to provide a panoramic display that continues across both monitors.

You want to move the system tray to the secondary monitor. Both monitors must continue to display screen data.

Which Display setting you select?

- A. Custom scaling
- B. Show only on 2
- C. Extend desktop to this display
- D. Make this my main display

Correct Answer: D

### QUESTION 5

When you copy a file from one NTFS file system partition to a different NTFS partition, what happens to the file permissions of the copied file?

- A. They are the combined permissions of the original file and destination folder
- B. They inherit the permissions of the destination folder
- C. They remain the same as the original
- D. They are removed, and only the creator is given full control

Correct Answer: B

When you copy a protected file to a folder on the same, or a different volume, it inherits the permissions of the target directory.
