QUESTION 1

This question requires that you evaluate the underlined text to determine if it is correct.

In order to install Microsoft Intune client software on a computer, you need to be a member of that computer\\'s "Administrators" group. Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If

the statement is incorrect, select the answer choice than makes the statement correct.

A. No change is needed

B. Remote Management users

C. Power users

D. Remote Desktop users

Correct Answer: A

The account that installs the Intune client software must have local administrator permissions to that computer.

QUESTION 2

This question requires that you evaluate the underlined text to determine if it is correct.

The "ExFAT" file system can automatically verify and auto correct data to avoid file system errors.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

A. No change is needed

B. NTFS

C. FAT32

D. ReFS

Correct Answer: D

Resilient File System (ReFS) is a Microsoft proprietary file system introduced with Windows Server 2012 with the intent of becoming the "next generation" file system after NTFS. ReFS key design advantages are intended to include automatic

integrity checking and data scrubbing, removing the need for chkdsk and protecting against data degradation.

Incorrect answers:

Not A: exFAT (Extended File Allocation Table) is a Microsoft file system optimized for flash drives. exFAT can be used where the NTFS file system is not a feasible solution (due to data structure overhead), or where the file size limit of the

standard FAT32 file system is unacceptable.

QUESTION 3

This question requires that you evaluate the underlined text to determine if it is correct.

Redundant Microsoft Azure applications are able to meet increased demand with consistent results in acceptable time windows.

Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

A. No change is needed

B. Highly Available

C. Fault Tolerant

D. Scalable

Correct Answer: D

Scalable applications are able to meet increased demand with consistent results in acceptable time windows.

When a system is scalable, it scales horizontally or vertically to manage increases in load while maintaining consistent performance. In basic terms, horizontal scaling adds more machines of the same size (processor, memory, bandwidth)

while vertical scaling increases the size of the existing machines.

QUESTION 4

When you copy a file from one NTFS file system partition to a different NTFS partition, what happens to the file permissions of the copied file?

A. They are the combined permissions of the original file and destination folder

B. They inherit the permissions of the destination folder

C. They remain the same as the original

D. They are removed, and only the creator is given full control

Correct Answer: B

When you copy a protected file to a folder on the same, or a different volume, it inherits the permissions of the target directory.
