## QUESTION 1

This question requires that you evaluate the underlined text to determine if it is correct.

Creating a "mail contact" by using the Microsoft Exchange Online GUI Console allows employees to reserve conference rooms for meetings.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed.
- B. resource mailbox
- C. distribution group
- D. mail user

Correct Answer: B

Resource mailboxes can be included as resources in meeting requests, providing a simple and efficient way to manage the scheduling of resources for your organization. There are two types of resource mailboxes in Microsoft Exchange Server: room and equipment.

Reference: What is an Exchange resource mailbox? How do I find them?

---

## QUESTION 2

You are the help desk technician for a local real estate firm that uses Microsoft Exchange Online.

A former employee is sending unwanted emails to employees within the firm.

You need to prevent this employee from sending emails to anyone at the firm.

What should you do?

- A. Create a malware filter policy.
- B. Configure a message trace.
- C. Create a content filter policy.
- D. Create a transport rule.

Correct Answer: D

You can use Exchange transport rules to look for specific conditions in messages that pass through your organization and take action on them. Transport rules are similar to the Inbox rules that are available in many email clients. The main difference between transport rules and rules you would set up in a client application such as Outlook is that transport rules take action on messages while they're in transit as opposed to after the message is delivered. Transport rules also contain a richer set of conditions, exceptions, and actions, which provides you with the flexibility to implement many types of messaging policies.

### QUESTION 3

This question requires that you evaluate the underlined text to determine if it is correct.

Service health "email alerts" allow multiple users to simultaneously access real-time information about service incidents in Microsoft Office 365.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. newsfeeds
- C. SMS alerts
- D. RSS feeds

Correct Answer: D

Go into your own Office 365 console, down to Service Health and in the top right corner there's an RSS icon.

Note: When a service impacting event occurs, Microsoft Customer Service and Support recognizes that timely and accurate communications are critical for customer organizations and partners. Microsoft notifies Office 365 subscribers by

updating the Service Health Dashboard that is available on the Office 365 portal.

### QUESTION 4

You recently set up Microsoft Intune for your company.

You need to assign a user a tenant role so that the user can reset certain password. You need to achieve this goal without giving the user the ability to change global administrator passwords.

Which two admin roles fulfill this requirement? (Choose two.)

- A. user management administrator
- B. service support administrator
- C. billing administrator
- D. global administrator

Correct Answer: AB

---

## QUESTION 5

You plan to use Microsoft Azure to host a new application.

You need to encrypt all data transferred to and from the application.

What should you do?

- A. Implement an SSL certificate.
- B. Configure synchronized identities.
- C. Implement a hybrid cloud.
- D. Configure user permissions.

Correct Answer: A
