**QUESTION 1**

The SecureString class:

- A. Ensures that a password is strong enough.
- B. Protects data from being revealed during garbage collection.
- C. Ensures that memory will always be available for a string.
- D. Remains in memory always.

Correct Answer: B

QUESTION 2

Common Intermediate Language (CIL) is converted into executable code by using:

- A. Microsoft Visual Studio.
- B. Interactive debugger.
- C. Just-in-Time (JIT) compiler.
- D. Intermediate Language Disassembler (ILDASM.exe).

Correct Answer: C

QUESTION 3

What is the characteristic of a delegate?

- A. A tightly coupled event
- B. An object that raises an event
- C. A type-safe function pointer
- D. A property function that includes optional parameters

Correct Answer: C

The .NET Framework defines a special type (Delegate) that provides the functionality of a function pointer.

A delegate is a class that can hold a reference to a method. Unlike other classes, a delegate class has a signature, and it can hold references only to methods that match its signature. A delegate is thus equivalent to a type-safe function pointer or a callback.

QUESTION 4

Which two actions should you perform to consume events defined in another class? (Each correct answer presents part of the solution. Choose two.)

- A. Define a method that raises the event.
- B. Set the current class as a sealed class.
- C. Place a reference to the consuming class in the class that raises the event.
- D. Match the signature of the delegate declared for the event.
- E. Define an event handler method

Correct Answer: DE

QUESTION 5

Custom event delegates are used to:

- A. Raise one or more custom events
- B. Handle errors generated in a try block.
- C. Route events to one or more event handlers.
- D. Process mouse clicks or keyboard input.

Correct Answer: C
