**QUESTION 2**

You have created a table in a document. You select the cell by pressing the Esc key to paste some data in a cell of the table. The data you are pasting has tabs and carriage returns in it.

What will happen when you paste this data to the selected cell?

- A. Data will not be pasted in the cell.
- B. InDesign maps the clipboard data into the cell.
- C. InDesign maps the clipboard data across more than one cell.
- D. InDesign maps the clipboard data across the all cells in the table.

Correct Answer: C

If you select the cell (this means if you press Esc to toggle between selecting what is inside the cell and the cell itself), and if the data you are pasting has tabs or carriage returns, InDesign maps the clipboard data across more than one cell. It will not paste the data in one cell in which you want to paste the data in the above scenario. To insert the data in the cell, you should insert the cursor inside the cell instead of selecting cell itself.

#### QUESTION 5

You are creating a document. You have created and applied a table style to a table that results in the table being filled with the yellow color. You also have a cell style which fills a cell with the blue color. What happens when you apply this
