**QUESTION 1**

Which of the following commands will you use to open discretionary hyphen?

- A. Layout > Insert Special Character > Hyphens And Dashes > Discretionary Hyphen
- B. Window > Insert Special Character > Hyphens And Dashes > Discretionary Hyphen
- C. Object > Insert Special Character > Hyphens And Dashes > Discretionary Hyphen
- D. Type > Insert Special Character > Hyphens And Dashes > Discretionary Hyphen

Correct Answer: D

A discretionary hyphen appears only if the word breaks. To open a discretionary hyphen use the following command. Type > Insert Special Character > Hyphens And Dashes > Discretionary Hyphen Answer: C, B, and A These options are invalid.

**QUESTION 2**

Which of the following are the audio file formats supported by InDesign? Each correct answer represents a complete solution. Choose all that apply.

- A. MP3 music
- B. QuickTime movie
- C. Microsoft WAV sound
- D. Apple AIFF

Correct Answer: ACD

Following are the file formats supported by InDesign:

- 1.Video files such as Flash video, QuickTime movie, and Microsoft AVI video
  - 2.Animation files such as Flash player presentation
  - 3.Audio files such as MP3 music, Apple AIFF, and Microsoft WAV sound
- 

**QUESTION 3**

Andy works as a Web developer for company Inc. He has created a Web page using InDesign CS5 with an extensive amount of information. He wants to use links for the convenience of the users of his Website so that they can directly get to a particular section on the current Web page.

Which of the following panels will Andy use to accomplish this task?

- A. Links panel

- B. Pages panel
- C. Preflight panel
- D. Hyperlinks panel

Correct Answer: D

The Hyperlinks panel is a feature of InDesign CS5 which is used to create hyperlinks in a document so that when a user exports to Adobe PDF or SWF in InDesign, a viewer can click a link to jump to other locations in the same document, to other documents, or to websites. To open the Hyperlinks panel in InDesign CS5, use one of the following steps: Choose Window > Interactive > Hyperlinks. Choose Window > Type and Tables > Cross-References.

Answer option A is incorrect. The Links panel is a feature of InDesign where all the files are listed and placed in a document. These include both local (on disk) files and assets that are managed on a server. However, the files that are pasted from a website in Internet Explorer are not displayed in this panel. The Links panel is shown in the image below:

Answer option B is incorrect. The Pages panel is used in InDesign to work with document pages as well as master pages. It allows a user to create pages,

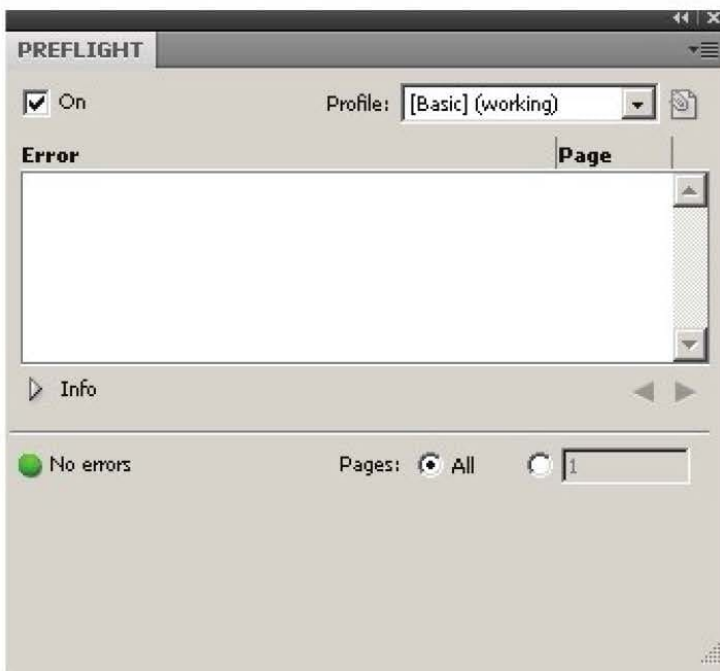

which can be blank pages or based on a master page. These pages can be moved, copied, and deleted, as well as for retrospectively applying a master. The Pages panel also provides an excellent method to navigate through longer documents. To open the Pages panel, choose **Window > Pages**, or press **Control+F12** on the keyboard. The Pages panel is shown in the image below:

Answer option C is incorrect. The Preflight panel is a feature of InDesign CS5 that warns of the problems that could prevent a document or book from printing or outputting as expected while a document is being edited. These problems include missing files or fonts, low-resolution images, overset text, and a number of other conditions.

The preflight settings can be configured to define which conditions are detected. These preflight settings are stored in preflight profiles for easy reuse. To open the Preflight panel, choose **Window > Output > Preflight**, and double-click the Preflight icon at the bottom of the document window. The Preflight icon is green if no errors are detected or red if errors are detected. The Preflight panel is shown in the image below:

#### QUESTION 4

You have created a table in your InDesign document. You want to paste a graphic in a cell of the table. To accomplish this task you have selected the cell by pressing Esc key and then pasted the graphic.

What will happen?

- A. The cell will be eliminated from the table.
- B. The graphic will be pasted in the more than one cell in the table.
- C. The graphic will not be pasted in the cell.
- D. The graphic will be pasted in the cell.

Correct Answer: C

You should place a graphic in a table cell in exactly the same way as you insert a graphic in text. Click the Type tool in a cell, or select some text inside a cell, then place a file or paste a graphic that you copied to the Clipboard. You must select text or have an active text insertion point because selecting the cell itself will not get the graphic into the cell. In the above scenario you selected only the cell and not the text inside the cell; this is why graphic is not pasted in the table cell.

---

### QUESTION 5

Which of the following allows you to resize several objects that have commonly aligned edges simultaneously, while keeping the gaps between them fixed?

- A. Gradient panel
- B. Align panel
- C. Gap tool
- D. Glyph panel

Correct Answer: C

A gap tool is used to adjust the size of a gap between two or more objects. It also allows a user to resize several objects that have commonly aligned edges simultaneously, while keeping the gaps between them fixed. It is a one-step way to adjust the layout by directly manipulating the space between objects.

Answer: B is incorrect. The Align panel is used to align or distribute objects horizontally or vertically along the selection, margins, page, or spread. To open the Align panel a user should use the following command: Window > Object and Layout

> Align The Align panel does not affect objects to which the Lock Position command is applied, and does not change the alignment of text paragraphs within their frames.

Answer: A is incorrect. The Gradient panel is useful for creating an unnamed gradient that will not be used often.

Answer: D is incorrect. The Glyphs panel is used to enter glyphs.
