QUESTION 1

A client\\'s security team needs protection from repository content modification outside of its network on its publish servers.

What provides the LEAST protection against this specific threat?

A. Disabling Sling POST Servlet and WebDAV functionality

B. Using Dispatcher filter rules to block access to /apps and /libs

C. Enforcing very strong passwords on all systems and using SSL

D. White-listing specific HTTP methods and URIs required for application functionality

Correct Answer: B

QUESTION 2

An architect must optimize the performance of the home page of a client\\'s website. The client requires that search engines index the home page content.

The home page must NOT be cacheable because it displays a list of recently shared articles.

This list is generated by using an AEM component that performs a real-time look-up to an API from a third-party company.

Which solution should the architect choose?

A. Replace the real-time API access with a scheduled job inside AEM that runs every 15 minutes to update the data and trigger a dispatcher cache flush

B. Replace the AEM component\\'s server-side logic with a JavaScript widget provided by the third p

C. Cache the home page using the Dispatcher and implement a cron job to remove the cached file every 15 minutes

D. Cache the rest of the home page and deliver the recently shared article list using AJAX

Correct Answer: A

QUESTION 3

A financial institution is identified as a business user. AEM/Campaigns/Segmentation rules must be based on the traits/data provided from the back end of the system.

Which two types of information must be captured in the discovery session? (Choose two.)

A. Whether any traits are combined to establish a segment

B. Format in which segmentation traits are retrieved

C. Keys/values for segmentation traits

D. How back end service is integrated to retrieve customer data

Correct Answer: BD

QUESTION 4

Which two business requirements can be achieved by using OOTB AEM components? (Choose two.)

A. A store details page displays an embedded map from Bing Maps.

B. A sidebar contains a list of PDF files tagged with the "Product Data Sheet" tag.

C. An article can be composed of an arbitrary combination of text, videos, and images.

D. An article has a Facebook Like button; the number of clicks are stored in Adobe Social.

Correct Answer: CD

QUESTION 5

A non-profit organization plans to migrate to AEM. The organization uses a content management system with a relational database to store content and HTML forms to input content. Currently, business users must upload images as part of a form element that will be rendered on a page.

During the discovery sessions, business users express major concern with this authoring experience.

Which AEM feature should be described to the business users to reduce their concern?

A. Authors can search for images and drop them on to pages in edit mode.

B. AEM can output content in multiple formats (html, json).

C. Authors can edit the content in place on the pages in edit mode.

D. AEM can store content in supported RDBMS.

Correct Answer: D
