-  **800,000+** Satisfied Customers

### QUESTION 1

In the following display, can status handling be enabled for both the Extract transformation and the Sort transformation?

- A. Yes. The Return Code Check transformation can be added to the job flow immediately following the Sort transformation - the Status Handling tab in this Return Code Check transformation properties can then establish the desired status handling for both the Extract and Sort transformations.
- B. No. Both the Extract and the Sort transformations do not have a Status Handling tab in their corresponding properties window, therefore it is not possible to establish status handling for these transformations.
- C. Yes. The Return Code Check transformation can be added to the job flow twice, once immediately following the Extract, and again immediately following the Sort - the Status Handling tab in each of the Return Code Check transformations properties can then establish the desired status handling.
- D. Yes. The status handling tab in the job properties window will allow you to select which transformation (or even several transformations) that you want to define status handling for.

Correct Answer: C

### QUESTION 2

How can you test the interaction of the options of a SAS Data Integration Studio Generated transformation?

- A. The transformation has to be used within a job to interactively test the options with the Test Prompt button in the Options window from the properties of the transformation within the job editor.
- B. The options can be tested after finalizing and saving the transformation with the Test Prompt item on the Tools menu.
- C. The options can be tested only after adding all options that are assigned to the source code with the Test Prompt button in the Options window of the New Transformation wizard.
- D. The options can be tested at any time after adding them to the transformation with the Test Prompt button in the

Options window of the New Transformation wizard.

Correct Answer: D

---

### QUESTION 3
