**QUESTION 1**

Consider the job flow diagram in the display. Which of these objects has parameters defined for it?

- A. Control table
- B. Loop transformation
- C. Inner Job
- D. Loop End

Correct Answer: C

QUESTION 2

A user needs to find out who has the SAS Data Integration Studio job "Create Tables" checked out. What action should the user perform?

- A. They need to select the "Properties" menu option and then the "Advanced" tab for the SAS Data Integration Studio job "Create Tables" within Data Integration studio.
- B. They need to select the History menu option for the SAS Data Integration Studio job "Create Tables" once it has been checked in.
- C. They need to select the History menu option for the SAS Data Integration Studio job "Create Tables".
- D. They are not able to find out who has the SAS Data Integration Studio job "Create Tables" in checked out status because they are not an administrator.

Correct Answer: C

QUESTION 3

In SAS Data Integration Studio, which statement is FALSE regarding status handling?

- A. When a job is executed in SAS Data Integration Studio, a return code for each transformation in the job is captured in a macro variable. The return code for the job is set to the least successful transformation in the job. SAS Data Integration Studio enables you to associate a return code condition, such as Successful, with an action, such as Send Email.
- B. If status handling has been defined for a transformation or the job, a macro definition (and a call to it) will be added to the generated code to check for the specified condition(s).

C. Only one Condition/Action pair can be defined for a single transformation or for a job.

D. The available Condition/Action pairs for transformations and jobs will vary - that is, different Condition/Action pairs may exist for the SQL Join transformation versus the Table Loader transformation.

Correct Answer: C

QUESTION 4

The SAS platform application that can surface the different types of business and analytic content such as information maps, stored processes, and reports on the web browser is:

A. SAS Information Delivery Portal

B. SAS Information Map Studio

C. SAS Web Report Studio

D. SAS OLAP Cube Studio

Correct Answer: A

QUESTION 5

In SAS Data Integration Studio, where must the columns included in a business key exist?

A. in the source and standardization tables

B. in the source and dimension tables

C. in the target and fact tables

D. in the source, dimension and standardization tables

Correct Answer: B
