QUESTION 1

How can you test the interaction of the options of a SAS Data Integration Studio Generated transformation?

A. The transformation has to be used within a job to interactively test the options with the Test Prompt button in the Options window from the properties of the transformation within the job editor.

B. The options can be tested after finalizing and saving the transformation with the Test Prompt item on the Tools menu.

C. The options can be tested only after adding all options that are assigned to the source code with the Test Prompt button in the Options window of the New Transformation wizard.

D. The options can be tested at any time after adding them to the transformation with the Test Prompt button in the Options window of the New Transformation wizard.

Correct Answer: D

QUESTION 2

In SAS Data Integration Studio, an index can be specified/defined in which location?

A. the Indexes tab in the properties of a Table Loader transformation

B. the Indexes tab in the properties of a table metadata object

C. the Indexes tab in the properties for any transformation

D. the Indexes tab in the properties of a job metadata object

Correct Answer: B

QUESTION 3

When using the Table Loader transformation to load an existing target table that contains one or more indexes in SAS Data Integration Studio, which statement is true?

A. Indexes are removed when the Table Loader executes and must be re-created using the Table Structure transformation.

B. Indexes are automatically preserved when the Table Loader executes.

C. Indexes are removed at the beginning of the load process and must be re-created in a subsequent job step.

D. Indexes can be removed or preserved at the beginning of the process depending on options chosen. Additional table loader options specify whether to re-create the index at the end of the process.

Correct Answer: D

QUESTION 4

Which statement best describes a deployment directory as used in the Schedule Manager in SAS Management Console?

A. A folder or directory location on a server where the SAS code from a deployed SAS Data integration Studio job is stored.

B. A location in the metadata repository where job flows are deployed.

C. A location in the SAS Management console job directory storing the metadata for jobs that can be added to job flows.

D. A SAS Folder in the Schedule Manager plug-in within SAS Management Console containing listings of all flows organized by server type.

Correct Answer: A

QUESTION 5

Which statement best describes the DataFlux Integration Server?

A. An application server that executes service requests based on Simple Object Access Protocol (SOAP) to call dfPower Architect or dfPower Profile jobs.

B. A plug-in to SAS Data Integration Studio allowing you to design jobs specialized for data cleansing operations.

C. An application interface that allows you to build dfPower Architect and dfPower Profile jobs specialized for data cleansing operations.

D. A third party server defined in the SAS metadata repository that allows you to build flows integrating multiple jobs and establishing job dependencies within the flow.

Correct Answer: A
