**QUESTION 1**

Which capabilities are available when creating a SAS Information Map from a SAS OLAP Cube? (Choose two.)

- A. Associating a SAS Stored process with an information map that uses an OLAP Cube as a data source
- B. Simple filter creation
- C. Creating calculated members
- D. Joining multiple cubes within one information map

Correct Answer: BC

QUESTION 2

Refer to the exhibit:

```
25      %STPBEGIN;
26
27      * End EG generated code (do not edit this line);
28
29
30      options validvarname=any;
31
32      libname osdm meta library='Orion Reporting Library';
ERROR: No metadata objects found matching the specified URI.
ERROR: Error in the LIBNAME statement.
```

What is causing the error message from the stored process created from a SAS program, given the log display in the exhibit?

- A. There is no libref OSDM registered in the metadata
