**QUESTION 1**

You are asked by management to document all jobs written to make future maintenance easier. Which statement is true about annotations?

- A. The short job description can be identified within the Description Annotation stage.
- B. The Description Annotation stage contains both the short and full descriptions for the job.
- C. The background for the Description Annotation stage can be changed for each unique stage.
- D. The Description Annotation stage can be added several times at different locations to identify business logic.

Correct Answer: A

QUESTION 2

In a Transformer expression for a stage variable, there is a nullable input column. Assume the legacy NULL processing option is turned off. What happens when a row is processed that contains NULL in that input column?

- A. The job aborts.
- B. The row is rejected.
- C. NULL is written to the stage variable.
- D. The value written to the stage variable is undetermined.

Correct Answer: C

QUESTION 3

You have created three parallel jobs (Job A, B and C) in which the output of one job is the input to the other job. You are required to create processing that manages this data relationship of the jobs and provide job level restart-ability. What two tasks will accomplish these objectives? (Choose two.)

- A. Enable runtime column propagation for the job sequence running the jobs.
- B. Set the '\\Add checkpoints so sequence is restartable\\' option in the Sequencer job.
- C. Enable the '\\Add checkpoints so container is restartable\\' option for each of the parallel shared containers.
- D. Create two parallel shared containers that has the logic of Job B and Job C and include those shared containers in the correct flow order within the design of Job A.
- E. Create a Sequencer job that has triggered events configured allowing Job A to run first, then Job B to run when A completes successfully, and then Job C to run when Job B completes successfully.

Correct Answer: BE

QUESTION 4

What is used to configure the DataStage QualityStage Operations Console?

- A. DataStage Administrator
- B. The DSODBCConfig.cfg file
- C. The DSAppWatcher.sh script
- D. Information Server Web Console

Correct Answer: B

QUESTION 5

Identify the two delimiter areas available to be configured in the Sequential File format tab properties? (Choose two.)

- A. File delimiter
- B. Null delimiter
- C. Final delimiter
- D. Field delimiter
- E. End of group delimiter

Correct Answer: CD
