QUESTION 1

What will the IBM SOA Assessment Tool help to define?

- A. The most appropriate SOA entry point
- B. The benefits of leveraging existing applications
- C. Recommendations for moving to the highest level of SOA maturity
- D. The service funding and ownership model to increase SOA maturity

Correct Answer: A

QUESTION 2

In a growth industry, what is the most effective technique to secure executive sponsorship from a line of business for a company's adoption of SOA?

- A. Present the IT savings that can be achieved via an SOA-based reuse strategy.
- B. Emphasize the significant market acceptance of SOA as the new standard architectural style.
- C. Focus on the rate of change in the industry and the need for business agility to take advantage of these marketplace changes.
- D. Send the executive the recent article describing a competitor's SOA success that has just been published in the latest issue of an industry trade magazine.

Correct Answer: C

QUESTION 3

What is one architectural principle surrounding SOA?

- A. Inheritance
- B. Encapsulation
- C. Cross-cutting concern
- D. Focus on messaging strategies

Correct Answer: B

QUESTION 4

How can a company enforce adherence to the SOA policies that have been defined?

- A. Define and execute conformance checkpoints across the service life cycle.
- B. Initiate and enable SOA governance communication, education and mentor plans.
- C. Commit to a strategy for SOA in the context of the business goals and IT strategy.
- D. Implement governance organizational structures such as architectural review boards, executive steering committees and Centers of Excellence (CoE) to ensure adherence.

Correct Answer: A

QUESTION 5

Which cross-cutting concerns are present at all areas within a logical SOA?

- A. Integration, security, management, monitoring and governance
- B. Logging, auditing, business processes, information architecture, identity provision and governance
- C. Encapsulation, separation of concerns, high cohesion, loose-coupling, correct granularity and abstraction
- D. Business flexibility, business agility, cost effectiveness, goal related, traceable requirements and continuous incremental improvement

Correct Answer: A
