#### QUESTION 1

What are two recommended approaches to SOA adoption?

- A. SOA adoption involves incremental change.
- B. Select a business pilot and enable a line of business.
- C. SOA adoption involves a complete and immediate change.
- D. The transition to SOA begins with the selection of appropriate technology.
- E. The first steps in the journey to SOA implementation depends on the company's industry.

Correct Answer: AB

---

#### QUESTION 2

What can have the largest impact on the performance of an SOA?

- A. Service granularity
- B. Use of open standards
- C. Service version management
- D. Business monitoring of Key Performance Indicators (KPIs)

Correct Answer: A

---

#### QUESTION 3

What demonstrates one of the key principles communicated by the IBM SOA Reference Architecture?

- A. Business processes can be modeled in parallel with the services they rely on.
- B. Services are implemented using the Enterprise Service Bus (ESB) and exposed to service consumers.
- C. Business process developers need to communicate effectively with Enterprise Service Bus (ESB) developers.
- D. Changes in service implementations require changes in the service interface which should be reflected in the service registry.

Correct Answer: A

---

#### QUESTION 4

Which activity is required to successfully implement SOA governance?

- A. Establish a service repository.
- B. Acquire ongoing sponsorship by executives with active communication.
- C. Formulate, control and oversee the proper maintenance and growth of business assets.
- D. Define a set of processes, rules and policies that affect the way a corporation is directed, administered or controlled.

Correct Answer: B

---

#### QUESTION 5

Why is reusability an important aspect to promoting agility in SOA?

- A. Services often represent functions in an SOA.
- B. Existing applications may serve as the basis for service interfaces.
- C. The interface of a service allows it to be integrated into additional processes without changes.
- D. Service interface details may be defined at a high level according to anticipated business requirements.

Correct Answer: C
