QUESTION 1

A user complains that they are no longer able to access a needed work application after you have implemented vulnerability and anti-spyware profiles. The user's application uses a unique port. What is the most efficient way to allow the user access to this application?

- A. Utilize an Application Override Rule, referencing the custom port utilized by this application. Application Override rules bypass all Layer 7 inspection, thereby allowing access to this application.
- B. In the Threat log, locate the event which is blocking access to the user's application and create a IP-based exemption for this user.
- C. In the vulnerability and anti-spyware profiles, create an application exemption for the user's application.
- D. Create a custom Security rule for this user to access the required application. Do not apply vulnerability and anti-spyware profiles to this rule.

Correct Answer: B

QUESTION 2

Which of the following interface types can have an IP address assigned to it? (Select all correct answers.)

- A. Layer 3
- B. Layer 2
- C. Tap
- D. Virtual Wire

Correct Answer: A

QUESTION 3

When setting up GlobalProtect, what is the job of the GlobalProtect Portal? Select the best answer

- A. To maintain the list of remote GlobalProtect Portals and list of categories for checking the client machine
- B. To maintain the list of GlobalProtect Gateways and list of categories for checking the client machine
- C. To load balance GlobalProtect client connections to GlobalProtect Gateways
- D. None of the above

Correct Answer: B

QUESTION 4

Which of the following is True of an application filter?

- A. An application filter automatically adapts when an application moves from one IP address to another.
- B. An application filter automatically includes a new application when one of the new application's characteristics are included in the filter.
- C. An application filter specifies the users allowed to access an application.
- D. An application filter is used by malware to evade detection by firewalls and anti-virus software.

Correct Answer: B

QUESTION 5

When using Config Audit, the color yellow indicates which of the following?

- A. A setting has been changed between the two config files
- B. A setting has been deleted from a config file.
- C. A setting has been added to a config file
- D. An invalid value has been used in a config file.

Correct Answer: A
