- D. provide IP addresses to clients
- E. redirects clients to Aruba Firewall

Correct Answer: A

---

### QUESTION 5

A university, has 2 departments. Department 1 has its own mobility domain with one controller. Department

2 has multiple controllers configured in a second domain. The university is planning on offering a new application and needs users to be able to roam between both mobility domains.

What is the best way to accomplish this?

- A. The 2 existing domains should be left as they are. A 3rd mobility domain should then be created and all 3 controllers need to be added to it
- B. Merge the controllers into the same mobility domain
- C. The IP subnets of all controllers need to be configured to match

D. This cannot be accomplished

E. Create a new domain between a department 1 controller and one of the department 2 controllers

Correct Answer: B
