**QUESTION 1**

Alibaba Cloud Anti-DDoS Premium Service is an advanced DDoS protection product. It can defend against layer 4 and layer 7 attacks. Which of the following statements about Alibaba Cloud Anti-DDoS Premium Service is FALSE?

- A. Anti-DDoS Premium Service provides precise traffic reports and attack details in real time to keep you informed of the current service details on time
- B. Anti-DDoS Premium Service defends against various DDoS attacks, including but not limited to ICMP flood, UDP flood, TCP flood, SYN flood, and ACK flood attacks
- C. Anti-DDoS Premium Service supports 2 billing modes: Unlimited and Insurance.
- D. You can adjust the anti-DDoS elastic protection threshold to a higher level at any time, with the service interruption period no longer than 3 minutes

Correct Answer: C

---

**QUESTION 2**

Alibaba Cloud Anti-DDoS Premium can be used only when the origin site IP address is in Alibaba Cloud.

- A. True
- B. False

Correct Answer: B

---

**QUESTION 3**

If an ECS instance needs to be accessed by other applications from internet, a corresponding "port" must be enabled. For example, HTTP applications work on port 80, while FTP applications work on port 21. If an administrator configures network security policies for this ECS instance, which of the following policies is the safest?

- A. After buying an ECS instance, the administrator immediately enables the security group firewall on the console and opens ports 0-1024 for public networks
- B. After buying an ECS instance, the administrator immediately enables the security group firewall on the console and opens only the required service ports for public networks
- C. The administrator wants to build multiple applications on an ECS instance. For easy management, the administrator uses default settings and allows any IP address to access required service ports
- D. After buying an ECS instance, the administrator immediately enables the security group firewall on the console and opens all ports for public networks

Correct Answer: B

---

**QUESTION 4**

The ScheduleKeyDeletion function lets you schedule a time to delete Key Management Service (KMS) keys. How far in the future can a key deletion event be scheduled?

- A. 7 days
- B. 30 days
- C. 15 days
- D. 60 days

Correct Answer: C

---

#### QUESTION 5

Which of the following configurations is NOT a feature provided by Alibaba Cloud Web Application Firewall product?

- A. Blocked Regions
- B. HTTP ACL Policy
- C. Data Leakage Prevention
- D. Crawler Detection

Correct Answer: A
