**QUESTION 1**

Which log file should a developer use to search for exception stack traces?

A. /crx-quickstart/logs/request.log

B. /crx-quickstart/logs/error.log

C. /crx-quickstart/logs/access.log

D. /crx-quickstart/logs/info.log

Correct Answer: B

**QUESTION 2**

A developer needs to create a banner component. This component shows an image across the full width of the page. A title is shown on top of the image. This text can be aligned to the left, middle, or right. The core components feature a teaser component which matches almost all requirements, but not all.

What is the most maintainable way for the developer to implement these requirements?

A. Use and configure the teaser core component.

B. Create a new custom component from scratch.

C. Overlay the teaser core component.

D. Inherit from the teaser core component.

Correct Answer: A

**QUESTION 5**

A developer is working on a complex project with multiple bundles. One bundle provides an OSGi service for other bundles.

Which two options are necessary to ensure that the other bundles can reference that OSGi service? (Choose two.)

A. The bundles consuming the service need to import the fully qualified name of the service interface.

B. The service needs to correctly declare metatype information.

C. The bundle providing the service needs to contain a whitelist of allowed consumer bundles.

D. The bundle providing the service needs to contain an adequate SCR descriptor file.

E. The bundle providing the service needs to export the java package of the service interface.

Correct Answer: CE
