QUESTION 1

A customer's article search page queries using a XPath expression from a very large number of article pages on AEM. The page takes a long time to respond regardless of the number of results.

What is causing this issue?

- A. XPath expression based queries
- B. Dispatcher cache is not properly configured
- C. Rendering logic is not optimized for large results
- D. Indexing is not configured

Correct Answer: D

QUESTION 2

A customer wants to allow logged in/authenticated users to mark pages delivered from AEM as their favorite. The favorites are stored and retrieved using REST API from AEM.

The POST REST API call to store favorites always fails with a 403-forbidden error.

Which two configurations should the Architect review? (Choose two.)

- A. Session timeout configuration
- B. CSRF token configuration
- C. Apache Sling Referrer Filter configuration
- D. Authentication handler configurations
- E. User Sync handler configuration

Correct Answer: BC

QUESTION 3

A client needs to roll back published pages to a previous version in instances where content errors were uncovered. Previous versions of every published page should be made available for the authors to roll back if needed.

Which solution should an Architect recommend?

- A. Create editable template to autosave page versioning
- B. Modify the Page Activation workflow to include a versioning step

- C. Restore individual page versions from the AEM backup file
- D. Update the dispatcher.any file to force versioning of all pages

Correct Answer: B

QUESTION 4

A client needs to serve customer support-related video content to site visitors. They have videos hosted in the DAM, Facebook, YouTube and Vimeo.

Which video player solution should the client use?

- A. Use the AEM Dynamic Media component for all videos
- B. Use the out-of-the-box AEM HTML5 Video component
- C. Push all DAM videos to YouTube and use the video component
- D. Create a new video component to support the required formats

Correct Answer: D
