QUESTION 5

After creating the Entity Relationship (Diagram (ERD) of the data sources that will be connected into an AEP implementation for a utility company, the service details (including information such as name, cost type, and category) appear multiple times across different entities (for example, in the transactional events and in the customer profile details).

When designing the XDM data model for that ERD, the data architect and the business stakeholders validate that the service details information must be included at both levels, record, and time series. The service details will be used

multiple times within the same structure.

How should the service details be defined in the AEP data model to make it consistent and re-usable?

- A. Create a XDM Schema
- B. Create a Field Group
- C. Create a XDM Class
- D. Create a Data Type

Correct Answer: D
