**QUESTION 1**

You are going to create a backup of an Integration branch before implementing some new feature. What are two ways to create the backup of the integration branch? Choose 2 answers.

- A. Create a snapshot using the `ece-tools snapshot:create` command
- B. Create a snapshot using the snapshot button in the Project Web UI
- C. Create a snapshot using the `magento-cloud snapshot:create` command
- D. Submit a support ticket requesting a backup be made

Correct Answer: BC

QUESTION 2

You want to move static content deployment to the build phase of deployments. Which two actions do you take? Choose 2 answers.

- A. Download and commit `app/etc/config.php` from production
- B. Run `ece-tools scd-deploy:set build` on production
- C. Run `ece-tools config:dump` on production
- D. Use `scp` to copy `app/etc/config.php` from local to production

Correct Answer: BC

QUESTION 3

A merchant using Magento Commerce Cloud Pro reports an issue with an order missing transaction data.

The application uses a payment gateway integration which posts a series of callbacks to Magento.

You would like to retrieve a complete list of calls to build a timeline of what happened.

How do you achieve this?

- A. Use the `magento -cloud environment:logs` command to retrieve the `access.log` file from Production
- B. Use SSH to access all nodes and investigate the `access.log` files
- C. Use the `magento-cloud environment:ssh` command to access the environment and investigate the `access.log` file
- D. View the `access.log` file in the Project web UI

Correct Answer: B

**QUESTION 4**

While launching a site migrated from Magento 1 you are instructed to change the website CNAME record in your DNS provider by Magento for go live

What is the purpose of setting this record?

- A. Setting this record causes sent email to be properly authenticated and not show in junk folders
- B. Setting this record enables the page caching service for your site
- C. Setting this record is needed on Pro to allow upsizing servers without downtime
- D. Setting this record reduces the time it takes for customers to start seeing your Magento 2 site

Correct Answer: B

QUESTION 5

You cloned the Integration branch to your local environment and Imported the database dump from Integration. You performed composer install and bin/magento setup:install.

While placing an order using PayPal Express, the following error occurs:

PayPal gateway has rejected request. Security header is not valid (#10002: Security error).

What is the cause of this error?

- A. A new encryption key has been created on the setup:install action.
- B. The folder var/session has no write permissions for the web server user.
- C. Paypal Sandbox API credentials are not valid for the local environment.
- D. The PHP extension mcrypt has not been installed locally.

Correct Answer: A
