### QUESTION 1

Scenario

A pro-development city manager tells you, the planner, that you must provide findings to support a shift in a natural resources boundary in order to accommodate a particular development. What might you do?

A. Answer: See the solution below

Correct Answer: A

First, you should clarify all relevant policies and regulations. Suppose the relevant policies are in conflict or are difficult to interpret. You might ask the planning director the city attorney for assistance in defining the situation. Second, determine

how the boundary was established and study how it might be shifted.

Suppose the data that are available for the analysis are unreliable, inconsistent, or out-of- date. You might ask the planning director, another planner, or another source (such as the state GIS library) for assistance in obtaining better data. You

might verify the accuracy of the data you collect by learning how it was developed and how recently it was developed because sometimes data are in error and natural conditions do change over time (Ethical Principle 1)
