**QUESTION 1**

In Einstein Discovery:

A. "What Is The Difference" insights are comparative insights that help you better understand the relationships between explanatory variables and the goal (target outcome variable) in your story. These insights, based on a statistical analysis of your dataset, help you figure out which factors contribute to the biggest changes in the outcome variable. Einstein Discovery uses waterfall charts to help you visualize comparisons in What Is The Difference insights.

B. "Why It Happened" insights help you take a deeper look into the exact factors that led to an outcome. Why It Happened s/ Q insights drill deeper into the various factors that contributed to your story's goal. These insights are based on a statistical analysis of your dataset. Einstein Discovery uses waterfall charts to help you visualize Why It Happened insights.

C. "Predictions and Improvements" insights help you explore what might happen in the future. For example, you can interactively perform "what if analyses in your story. Einstein Discovery provides you with predictions and suggested improvements based on a statistical analysis of your dataset and predictive analytics. To help you visualize these insights, Einstein Discovery uses:

D. - waterfall charts for predictions

-bar charts for suggested improvements

E. "What Happened" insights are the primary insights in your story. They are descriptive insights that help you explore, at an y/ Q overview level, what factors contributed to the outcome, based on a statistical analysis of your dataset. Einstein Discovery uses bar charts to help you visualize What Happened insights.

Correct Answer: ACD

QUESTION 2

A new field called "CardBalance" is added to the standard object. Account. The team wants to add this new field to an Einstein Analytics dataset that sources the Account object; however, the team needs to limit the users who are able to view that field's data in the dataset.

How can an Einstein Consultant help them implement this new requirement?

A. Add the new field to the existing dataset and use the XMO file parameters to hide the new field from users who should not have access to it.

B. Add the new field to the existing dataset and activate "Sharing inheritance" in the Account object so only users who have access to the field in Salesforce will have access in Einstein Analytics.

C. Create a new Account dataset containing the new field and give access to this dataset only to users who should be able to see the new field.

D. Add the new field to the existing dataset and use "Security Predicates" to hide it from users who should not access it.

Correct Answer: C

**QUESTION 3**

An Einstein Analytics consultant is notified of a performance issue with data sync (replication). The consultant researches the issue and determines that unnecessary data is being synced.

Which solution should the consultant implement to help improve data sync (replication) performance?

- A. Modify dataflows to exclude unused fields and include a filter to extract relevant data.
- B. Scale down the number of datasets to help improve data sync (replication) performance.
- C. Start over again with new dataflows that exclude unused fields with a filter to extract relevant data.
- D. Update the existing data sync (replication) process by removing unused fields with a filter to extract relevant data.

Correct Answer: D

QUESTION 4

What permissions are necessary for someone to edit the XMD?

- A. Upload External Data to Analytics
- B. Manage Analytics Templated Apps
- C. Edit Analytics Dataflows
- D. Edit Dataset Recipes

Correct Answer: AC

QUESTION 5

The Einstein Analytics Plus Platform license is enabled for a Salesforce org and assigned to each user. However, these users cannot see the Einstein Analytics Studio in the App Launcher.

How can this issue be addressed?

- A. Share the app with the users in Einstein Analytics.
- B. Create user accounts for the users in Einstein Analytics.
- C. Assign the users to the permission set containing Use Analytics.
- D. Assign the users to the permission set containing Manage Analytics.

Correct Answer: C
