### QUESTION 1

You're working as a Cloud Engineer for a small company. The lead developer needs to create some new projects in order to get started with deploying the codebase. She tried to create a project and received an error. She messaged you on Slack to ask for help, though, she couldn't recall the exact error message. You checked and found that she does have Project Creator permissions. Keeping in mind the principle of least privilege, what is the best role to grant her so that she can create billable projects?

- A. The "Billing Account Administrator" role.
- B. The "Billing Account User" role.
- C. The "Project Owner" role.
- D. The "Billing Account Viewer" role.

Correct Answer: B

---

### QUESTION 2

You need to help a developer install the App Engine Go extensions. However, you've forgotten the exact name of the component. Which command could you run to show all of the available options?

- A. gcloud config list
- B. gcloud component list
- C. gcloud config components list
- D. gcloud components list

Correct Answer: D

---

### QUESTION 3

Your organization has user identities in Active Directory. Your organization wants to use Active Directory as their source of truth for identities. Your organization wants to have full control over the Google accounts used by employees for all Google services, including your Google Cloud Platform (GCP) organization. What should you do?

- A. Use Google Cloud Directory Sync (GCDS) to synchronize users into Cloud Identity.
- B. Use the cloud Identity APIs and write a script to synchronize users to Cloud Identity.
- C. Export users from Active Directory as a CSV and import them to Cloud Identity via the Admin Console.
- D. Ask each employee to create a Google account using self signup. Require that each employee use their company email address and password.

Correct Answer: A

#### QUESTION 4

All development (dev) teams in your organization are located in the United States. Each dev team has its own Google Cloud project. You want to restrict access so that each dev team can only create cloud resources in the United States (US).

What should you do?

- A. Create a folder to contain all the dev projects Create an organization policy to limit resources in US locations.
- B. Create an organization to contain all the dev projects. Create an Identity and Access Management (IAM) policy to limit the resources in US regions.
- C. Create an Identity and Access Management
