QUESTION 1

Heparin is an anticoagulant.

What is the primary purpose of drugs like Heparin?

- A. to cause nausea
- B. to prevent the heart from stopping
- C. to cause drowsiness
- D. to prevent the blood from clotting

Correct Answer: D

Explanation:

An anticoagulant is a substance that stops blood from clotting.

QUESTION 2

Which of these has the most influence on oceanic tides?

- A. the gravitational pull of the Sun on the Earth
- B. the gravitational pull of the Moon on the Earth
- C. the rotational turn of the Earth on its axis
- D. the shifting of tectonic plates

Correct Answer: B

QUESTION 3

A Celsius temperature of 100 degrees is equivalent to a Fahrenheit temperature of _____.

- A. 100 degrees
- B. 32 degrees
- C. 0 degrees
- D. 212 degrees

Correct Answer: D

Explanation:

Celsius temperature of 100 degrees = 212 degree Fahrenheit

QUESTION 4

Which of the following is NOT a fruit?

- A. Corn
- B. Tomatoes
- C. Peppers
- D. Carrots

Correct Answer: D

Explanation:

Fruits have seeds.

Carrots do not have seeds and are considered a vegetable.

Corn is scientifically a fruit since it is the seed of the corn plant.

QUESTION 5

The temperature of the atmosphere is less during the nighttime hours because _____.

- A. the side of the earth not feeling the sun loses heat by convection
- B. the side of the earth feeling the sun loses heat by evaporation
- C. the side of the earth not feeling the sun loses heat by radiation
- D. people set their thermostats lower when they go to bed

Correct Answer: C

Explanation:

The temperature of the atmosphere falls during the nighttime hours because the side of the earth not facing the sun loses heat by radiation.
