QUESTION 1

An ecommerce company manages its application's infrastructure by using AWS Elastic Beanstalk. A developer wants to deploy the new version of the application with the least possible application downtime. The developer also must minimize

the application's rollback time if there are issues with the deployment.

Which approach will meet these requirements?

- A. Use a rolling deployment to deploy the new version
- B. Use a rolling deployment with additional batches to deploy the new version
- C. Use an all-at-once deployment to deploy the new version
- D. Deploy the new version to a new environment Use a blue/green deployment

Correct Answer: D

QUESTION 2

Which requirement must be met for a member account to be unlinked from an AWS organization account?

- A. The linked account must be activity compliant with AWS System and Organization Controls (SOC)
- B. The payer and the linked account both create AWS Support cases to request that the member account be unlinked from the organization.
- C. The monitor account must meet the requirements of a standalone account.
- D. The payer account must be used to remove the linked account from the organization

Correct Answer: D

QUESTION 3

A system administrator notices that several Amazon EC2 instances have been terminated. The system administrator needs to identify the user or AWS API call that terminated these instances. Which AWS service should the system administrator use to meet this requirement?

- A. AWS Trusted Advisor
- B. AWS CloudTrail
- C. Amazon Inspector
- D. Amazon Detective

Correct Answer: B

**QUESTION 4**

An application that runs on Amazon EC2 needs to accommodate a flexible workload that can run or terminate at any time of day. Which pricing model will accommodate these requirements at the LOWEST cost?

- A. Spot Instances
- B. Reserved Instances
- C. On-Demand Instances
- D. Dedicated Host

Correct Answer: A

QUESTION 5

A company needs to evaluate its AWS environment and provide best practice recommendations in five categories: cost, performance, service limits, fault tolerance, and security. Which AWS service can the company use to meet these requirements?

- A. AWS Shield
- B. AWS WAF
- C. AWS Trusted Advisor
- D. AWS Service Catalog

Correct Answer: C

C ?AWS Trusted Advisor is used to evaluate its AWS environment and provide best practice recommendations in five categories: cost, performance, service limits, fault tolerance, and security.

AWS Shield is for DDoS protection.

AWS WAF is for SQL injection protection.

AWS Service Catalog is for managing services.
