**100% Passing Guarantee**
**100% Money Back Assurance**

Following Questions and Answers are all new published by Microsoft Official Exam Center

**QUESTION 1**

You have an Azure subscription named Subscription1. Subscription1 contains the resource groups in the following table.

| Name | Azure region | Policy |
|------|-------------|--------|
| RG1 | West Europe | Policy1 |
| RG2 | North Europe | Policy2 |
| RG3 | France Central | Policy3 |

RG1 has a web app named WebApp1. WebApp1 is located in West Europe. You move WebApp1 to RG2. What is the effect of the move?

A. The App Service plan to WebApp1 moves to North Europe. Policy2 applies to WebApp1.

B. The App Service plan to WebApp1 moves to North Europe. Policy1 applies to WebApp1.

C. The App Service plan to WebApp1 remains to West Europe. Policy2 applies to WebApp1.

D. The App Service plan to WebApp1 remains to West Europe. Policy1 applies to WebApp1.

Correct Answer: C

You can move an app to another App Service plan, as long as the source plan and the target plan are in the same resource group and geographical region. The region in which your app runs is the region of the App Service plan it\\'s in. However, you cannot change an App Service plan\\'s region.

**QUESTION 2**

You have an Active Directory forest named contoso.com.

You install and configure Azure AD Connect to use password hash synchronization as the single sign-on (SSO) method. Staging mode is enabled.

You review the synchronization results and discover that the Synchronization Service Manager does not display any sync jobs.

You need to ensure that the synchronization completes successfully.

What should you do?

A. From Synchronization Service Manager, run a full import.

B. Run Azure AD Connect and set the SSO method to Pass-through Authentication.

C. From Azure PowerShell, run Start-AdSyncSyncCycle -PolicyType Initial.

D. Run Azure AD Connect and disable staging mode.

Correct Answer: D

Staging mode must be disabled. If the Azure AD Connect server is in staging mode, password hash synchronization is temporarily disabled.

**TERMS**

By clicking "Create", I (a) agree to the legal terms and privacy statement(s) associated with the Marketplace offering(s) listed above; (b) authorize Microsoft to bill my current payment method for the fees associated with the offering(s), with the same billing frequency as my Azure subscription; and (c) agree that Microsoft may share my contact, usage and transactional information with the provider(s) of the offering(s) for support, billing and other transactional activities. Microsoft does not provide rights for third-party offerings. See the Azure Marketplace Terms for additional details.

When you are finished performing all the tasks, click the \\'Next\\' button.

Note that you cannot return to the lab once you click the \\'Next\\' button. Scoring occur in the background while you complete the rest of the exam.

Overview

The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn\\'t matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

To start the lab

You may start the lab by clicking the Next button.

You plan to deploy several Azure virtual machines and to connect them to a virtual network named VNET1007.

You need to ensure that future virtual machines in VNET1007 can register their name in an internal DNS zone named corp7523690.com. The zone must NOT be hosted on a virtual machine.

What should you do from Azure Cloud Shell?

To complete this task, start Azure Cloud Shell and select PowerShell(Linux). Click Show Advanced Settings, and then enter corp7523690n1 in the Storage account text box and File1 in the File share text box. Click Createstorage, and then complete the task.

Correct Answer:

Step 1: New-AzureRMResourceGroup -name MyResourceGroup Before you create the DNS zone, create a resource group to contain the DNS zone. Step 2: New-AzureRmDnsZone -Name corp7523690.com -ResourceGroupName MyResourceGroup A DNS zone is created by using the New-AzureRmDnsZone cmdlet. This creates a DNS zone called corp7523690.com in the resource group called MyResourceGroup. References: https://docs.microsoft.com/en-us/azure/dns/dns-getstarted-powershell

**QUESTION 4**

You have an on-premises network that includes a Microsoft SQL Server instance named SQL1.

You create an Azure Logic App named App1.

You need to ensure that App1 can query a database on SQL1.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

**Actions**

From the Azure portal, create an on-premises data gateway.

From an on-premises computer, install an on-premises data gateway.

Create an Azure virtual machine that runs Windows Server 2016.

From an Azure virtual machine, install an on-premises data gateway.

From the Logic Apps Designer in the Azure portal, add a connector.

**Answer Area**

Correct Answer:

**Actions**

Create an Azure virtual machine that runs Windows Server 2016.

From an Azure virtual machine, install an on-premises data gateway.

**Answer Area**

From an on-premises computer, install an on-premises data gateway.

From the Azure portal, create an on-premises data gateway.

From the Logic Apps Designer in the Azure portal, add a connector.

**QUESTION 5**

You create an Azure web app named WebApp1. WebApp1 has the autoscale settings shown in the following exhibit.

```
Autoscale setting name    Rule1
Resource group            VNRG
Instance count            1
```

```
Default Auto created scale condition

Scale mode      ○ Scale base on a metric    ● Scale to a specific instance count

Instance count  [ 1 ]

Schedule   This scale condition is executed when none of the other scale condition(s) match
```

The scale out and scale in rules are configured to have a duration of 10 minutes and a cool down time of five minutes.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE:Each correct selection is worth one point.

Hot Area:

If on August 8, 2018, WebApp1 is used at more than 85 percent for 15 minutes, WebApp1 will be running [answer choice].

| ▼ |
| --- |
| one instance |
| two instances |
| four instances |
| six instances |
| ten instances |

If on July8, 2018, WebApp1 is used at less than 15 percent for 60 minutes, WebApp1 will be running [answer choice].

| ▼ |
| --- |
| one instance |
| two instances |
| three instances |
| four instances |
| six instances |

Correct Answer:

If on August 8, 2018, WebApp1 is used at more than 85 percent for 15 minutes, WebApp1 will be running **[answer choice]**.

| |
|---|
| one instance |
| two instances |
| four instances |
| six instances |
| ten instances |

If on July 8, 2018, WebApp1 is used at less than 45 percent for 60 minutes, WebApp1 will be running **[answer choice]**.

| |
|---|
| one instance |
| two instances |
| three instances |
| four instances |
| six instances |
