**QUESTION 1**

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop host pool named Pool1 that is integrated with an Azure Active Directory Domain Services (Azure AD DS) managed domain.

You need to configure idle session timeout settings for users that connect to the session hosts in Pool1.

Solution: From the Azure portal, you modify the Advanced settings in the RDP Properties of Pool1.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 2**HOTSPOT**

You have a hybrid Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2
User3	Group1, Group3

You have an Azure Virtual Desktop host pool. All the session hosts have a folder named C:\Folder1. You create an FSLogix Application Masking rule as shown in the following exhibit.

Edit Rule

Hiding Rule

Object Name:
%SystemDriverFoler%\Folder1 Browse...

Object Type

- ☐ File / Registry Value
- ☒ Directory / Registry Key
- ☐ Printer
- ☐ Font

Comment:
Comment

OK Cancel

You create assignments for the Application Masking rule as shown in the following exhibit.

Assignments

Rule Set:

Assignment	Applies
Everyone	Yes
CONTOSO\Group1	No
CONTOSO\Group3	Yes
User2@contoso.com	No

Set As Template

Move Up

Move Down

Add

Remove

☐ Rule Set does apply to user/group

☒ Rule Set does not apply to user/group

AD Reporting

OK

Cancel

Apply

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
User1 can see folder C:\Folder1 on a session host.	<input type="radio"/>	<input type="radio"/>
User2 can see folder C:\Folder1 on a session host.	<input type="radio"/>	<input type="radio"/>
User3 can see folder C:\Folder1 on a session host.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
User1 can see folder C:\Folder1 on a session host.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can see folder C:\Folder1 on a session host.	<input checked="" type="radio"/>	<input type="radio"/>
User3 can see folder C:\Folder1 on a session host.	<input type="radio"/>	<input checked="" type="radio"/>

QUESTION 3

DRAG DROP

You have an Azure Virtual Desktop host pool named Pool1, an application named App1, and an Azure file share named Share1.

You need to ensure that you can publish App1 to Pool1 by using MSIX app attach.

Which four actions should you perform in sequence before you publish App1? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Create an MSIX image.

Generate a signing certificate.

Upload the MSIX package to Share1.

Generate an encryption certificate.

Create an MSIX package.

Upload the MSIX image to Share1.

Answer Area

Correct Answer:

Actions

Upload the MSIX package to Share1.

Generate an encryption certificate.

Answer Area

Generate a signing certificate.

Create an MSIX package.

Create an MSIX image.

Upload the MSIX image to Share1.

QUESTION 4

You have an Azure Virtual Desktop host pool in the East US region.

You need to implement a disaster recovery solution that meets the following requirements:

1.

If users cannot connect to the Azure Virtual Desktop resources in the East US region, the users must be able to connect to the equivalent resources in the West US region.

2.

Users must connect to the Azure Virtual Desktop resources in either the East US or the West US region by selecting a single icon in the Remote Desktop client?

3.

In the event of a disaster, failover between the Azure regions must be initiated manually by an administrator.

4.

Failover times must be minimized. What should you do?

A. Configure a shared image gallery that has replicas in the East US and West US regions

B. Create new session hosts in the West US region and add the session hosts to an existing host pool

C. Create an additional host pool in the West US region

D. Enable Azure Site Recovery replication of the virtual machines to the West US region

E. Enable Azure Backup to a Recovery Services vault in the West US region

Correct Answer: D

Reference: <https://docs.microsoft.com/en-us/azure/virtual-desktop/disaster-recovery>

QUESTION 5

You have an Azure subscription that contains the resources shown in the following table.

Name	Type	Description
Account1	Azure NetApp Files account	Contains Cpool1
CPool1	Capacity pool	Contains Volume1
Volume1	Volume	None
AVDPool1	Azure Virtual Desktop host pool	Configured to store FSLogix user profiles in Account1

You need to ensure that users can restore files saved to their FSLogix profile. What should you do?

A. From the CPool1 blade in the Azure portal, create a new volume.

B. From the Azure portal, create an Azure Backup vault and a backup policy.

C. From the Volume1 blade in the Azure portal, create a snapshot policy.

D. From the Azure portal, create a Recovery Services vault and a backup policy.

Correct Answer: C

From the docs: Azure Files Premium tier integrates with Azure Backup and is supported in conjunction with FSLogix. Azure NetApp Files offers a similar snapshot mechanism to make copies of your FSLogix profile containers. <https://learn.microsoft.com/en-us/azure/architecture/example-scenario/wvd/windows-virtual-desktop-fslogix#backup-and-restore>
