## QUESTION 1

Note: This question is a part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are designing a storage solution to support on-premises resources and Azure-hosted resources.

You need to provide on-premises storage that has built-in replication to Azure.

Solution: You include Azure Table Storage in the design.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

---

## QUESTION 2

Note: This question is a part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are designing an Azure solution for a company that has four departments. Each department will deploy several Azure app services and Azure SQL databases.

You need to recommend a solution to report the costs for each department to deploy the app services and the databases. The solution must provide a consolidated view for cost reporting.

Solution: Create a resources group for each resource type. Assign tags to each resource group.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

Tags enable you to retrieve related resources from different resource groups. This approach is helpful when you need to

organize resources for billing or management.

Reference: <https://docs.microsoft.com/en-us/azure/azure-resource-manager/resource-group-using-tags>

---

### QUESTION 3

You plan to create a new web app named WebApp8.

You need to ensure that all the resources for WebApp8 run in the West US location.

What should you do first?

NOTE: To answer this question, sign in to the Azure portal and explore the Azure resource groups.

- A. Modify the homepage 11234827 Azure App Service
- B. Modify the Azure App Service plan of the home page
- C. Deploy Azure Traffic Manager
- D. Create a new Azure App Service plan

Correct Answer: D

In App Service, an app runs in an App Service plan. An App Service plan defines a set of compute resources for a web app to run.

When you create an App Service plan in a certain region (for example, West Europe), a set of compute resources is created for that plan in that region.

Incorrect Answers:

B: You cannot change the location of an app service plan, regardless of subscription type. You simply need to create a new app service plan in the region you want

References: <https://docs.microsoft.com/en-us/azure/app-service/overview-hosting-plans>

### QUESTION 4

Note: This question is a part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an on-premises data center and an Azure subscription. The on-premises data center contains a Hardware Security Module (HSM).

Your network contains an Active Directory domain that is synchronized to an Azure Active Directory (Azure AD) tenant.

The company is developing an application named Application1. Application1 will be hosted in Azure by using 10 virtual machines that run Windows Server 2016. Five virtual machines will be in the West Europe Azure region and five virtual machines will be in the East US Azure region. The virtual machines will store sensitive company information. All the virtual machines will use managed disks.

You need to recommend a solution to encrypt the virtual machine disks by using BitLocker Drive Encryption (BitLocker).

Solution: Deploy one Azure Key Vault to each region. Create two Azure AD service principals. Configure the virtual machines to use Azure Disk Encryption and specify a different service principal for the virtual machines in each region.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

You would also have to import Import the security keys from the HSM into each Azure key vault.

Reference: <https://docs.microsoft.com/en-us/azure/security/azure-security-disk-encryption-prerequisites-aad>

---

## QUESTION 5

Your company has several Azure subscriptions that are part of a Microsoft Enterprise Agreement.

The company's compliance team creates automatic alerts by using Azure Monitor.

You need to recommend a solution to apply the alerts automatically when new subscriptions are added to the Enterprise Agreement.

What should you include in the recommendation?

- A. Azure Automation runbooks
- B. Azure Log Analytics alerts
- C. Azure Monitor action groups
- D. Azure Resource Manager templates
- E. Azure Policy

Correct Answer: E
