**QUESTION 1**

SIMULATION

You need to make the shares named Marketing and Sales from SRV1 available on the network by using the following UNC paths:

1.

`\\contoso.com\documents\marketing`

2.

`\\contoso.com\documents\sales`

To complete this task, sign in to the required computer or computers.

A. See explanation below.

B. Placeholder

C. Placeholder

D. Placeholder

Correct Answer: A

How to Set Up Windows Server for File Sharing

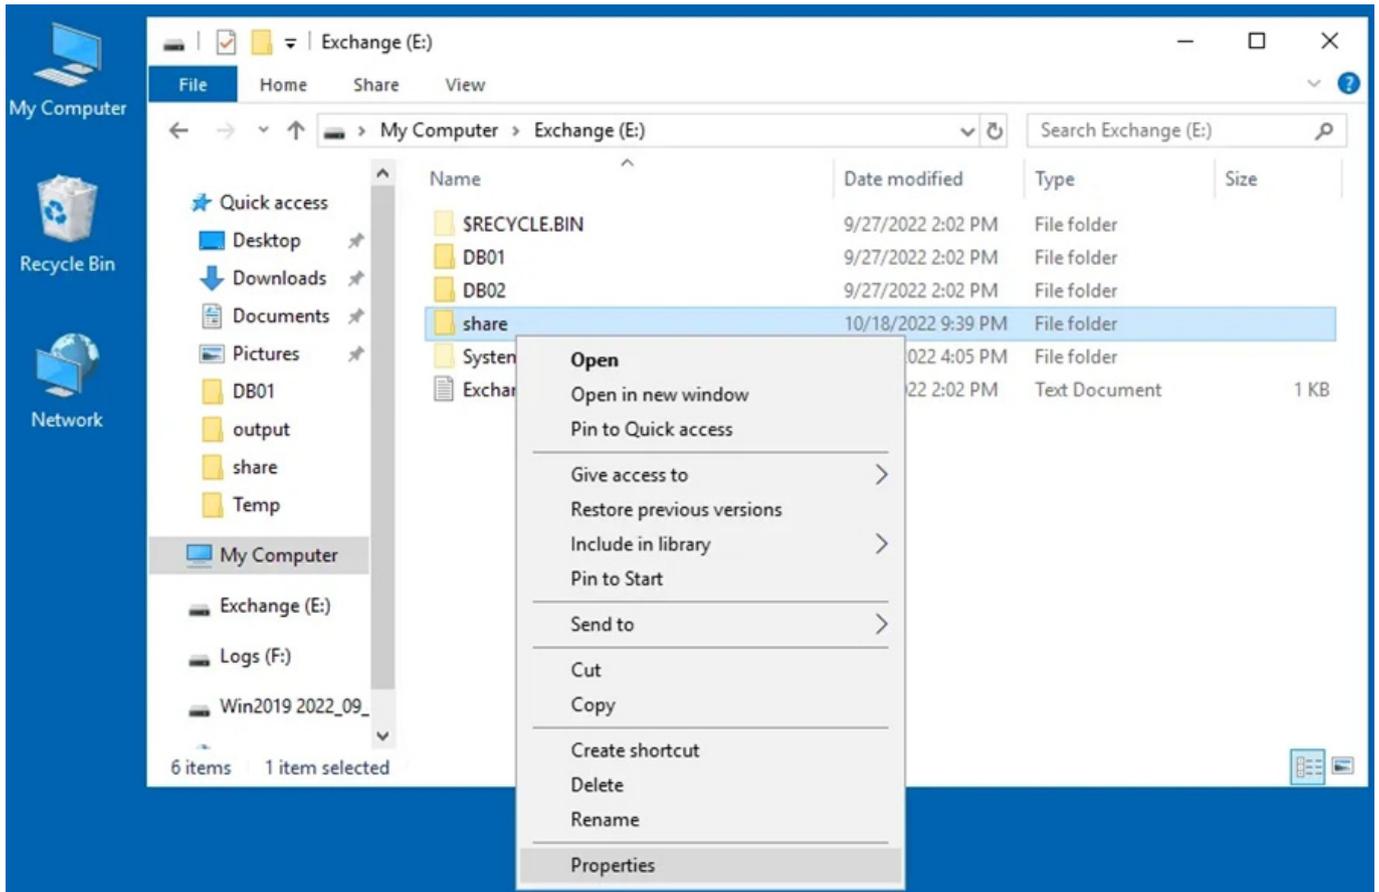

Windows File Sharing Setup

Step 1: Open the Computer Management window, which you can access by going to Server Manager > Tools > Computer Management. Open SRV1.

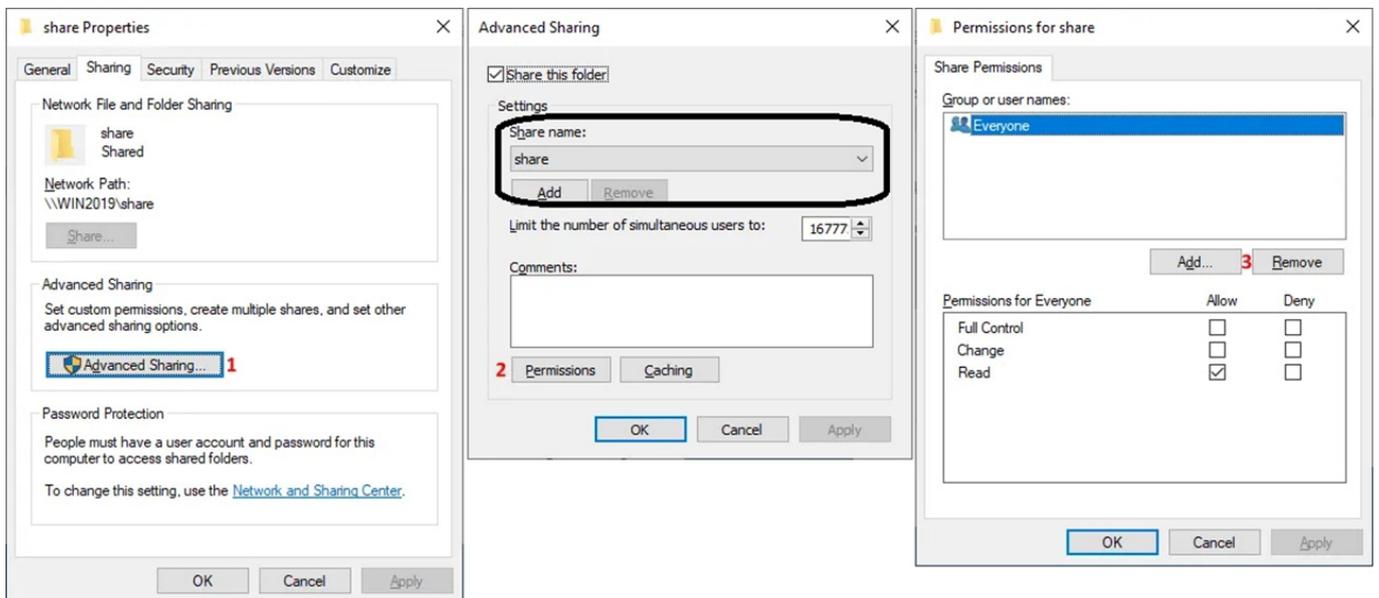

Step 2: Select the directory that you want to share (or select a new directory).

We select: `\\contoso.com\documents\marketing`

Step 3: Right-click this directory (folder) and in the context menu, hit Properties.

Step 4: Specify name of the Share as Marketing

Step 5: Share

QUESTION 2

Take two steps to implement an availability solution for DHCP. You must meet the networking requirements.

Choose the correct action from the following options.

NOTE: Each correct selection is worth one point.

- A. Add the DHCP cluster role on each DHCP server and install the Failover Clustering feature
- B. Configure a DHCP relay on the router in each office.
- C. Configure a scope that contains 25 percent of the IP addresses from Scope1 on DHCP2.
- D. Create a scope that contains 25 percent of the IP addresses from Scope2 On DHCP1.
- E. Configure DHCP failover on each DHCP scope

Correct Answer: AE

QUESTION 3

You have servers that run Windows Server 2022 as shown in the following table.

Name	Location	Description
Server1	On-premises	Hosts a Microsoft SQL Server 2019 instance
Server2	Azure	Contains the .NET SDK

Server2 contains a .NET app named App1.

You need to establish a WebSocket connection from App1 to the SQL Server instance on Server1. The solution must meet the following requirements:

1.

Minimize the number of network ports that must be open on the on-premises network firewall.

2.

Minimize administrative effort. What should you create first?

- A. an Azure Relay namespace
- B. an Azure VPN gateway
- C. a WFC relay connection
- D. a hybrid connection

Correct Answer: A

Hybrid Connections The Hybrid Connections feature in >>Azure Relay Run, type ntdsutil in the Open box, and then select OK.

3.

Type roles, and then press Enter.

Step 2: connect

4.

Type connections, and then press Enter.

Step 3: connect to server dc2.adatumcom

5.

Type connect to server , and then press Enter.

Note: In this command, is the name of the DC that you want to assign the Operation Master role to.

Step 4: quit

6.

At the server connections prompt, type q, and then press Enter.

Step 5: seize schema master

7.

Do one of the following actions:

To transfer the role: Type transfer , and then press Enter.

Note

In this command, is the role that you want to transfer. To seize the role: Type seize , and then press Enter. Note

In this command, is the role that you want to seize.

8. At the fsmo maintenance prompt, type q, and then press Enter to gain access to the ntdsutil prompt. Type q, and then press Enter to quit the Ntdsutil utility.
