QUESTION 1

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

| Statements | Yes | No |
|--|-----------------------|-----------------------|
| A single Microsoft account can be used to manage multiple Azure subscriptions. | <input type="radio"/> | <input type="radio"/> |
| Two Azure subscriptions can be merged into a single subscription. | <input type="radio"/> | <input type="radio"/> |
| A company can use resources from multiple subscriptions. | <input type="radio"/> | <input type="radio"/> |

Correct Answer:

| Statements | Yes | No |
|--|----------------------------------|----------------------------------|
| A single Microsoft account can be used to manage multiple Azure subscriptions. | <input checked="" type="radio"/> | <input type="radio"/> |
| Two Azure subscriptions can be merged into a single subscription. | <input type="radio"/> | <input checked="" type="radio"/> |
| A company can use resources from multiple subscriptions. | <input checked="" type="radio"/> | <input type="radio"/> |

QUESTION 2

In the infrastructure as a service (IaaS) cloud service model, which two components are the responsibility of the cloud service provider? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. the configuration and maintenance of storage
- B. the installation and configuration of the operating system
- C. maintaining the hardware
- D. the network configuration
- E. physical security of the datacenter infrastructure

Correct Answer: CE

Infrastructure as a service (IaaS) is a type of cloud computing service that offers essential compute, storage, and networking resources on demand, on a pay-as-you-go basis. IaaS is one of the four types of cloud services, along with software as a service (SaaS), platform as a service (PaaS), and serverless.

Migrating your organization's infrastructure to an IaaS solution helps you reduce maintenance of on-premises data centers, save money on hardware costs, and gain real-time business insights. IaaS solutions give you the flexibility to scale your IT resources up and down with demand. They also help you quickly provision new applications and increase the reliability of your underlying infrastructure.

IaaS lets you bypass the cost and complexity of buying and managing physical servers and datacenter infrastructure. Each resource is offered as a separate service component, and you only pay for a particular resource for as long as you need it. A cloud computing service provider like Azure manages the infrastructure, while you purchase, install, configure, and manage your own software - including operating systems, middleware, and applications.

QUESTION 3

Your company plans to migrate all its data and resources to Azure.

The company's migration plan states that only Platform as a Service (PaaS) solutions must be used in Azure.

You need to deploy an Azure environment that meets the company's migration plan.

What should you create?

- A. an Azure App Service and Azure SQL databases
- B. Azure storage accounts and web server in Azure virtual machines
- C. Azure virtual machines, Azure SQL databases, and Azure Storage accounts
- D. an Azure App Service and Azure virtual machines that have Microsoft SQL Server installed

Correct Answer: A

Azure App Service and Azure SQL databases are examples of Azure PaaS solutions. Therefore, this solution does meet the goal.

QUESTION 4

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

| | Yes | No |
|---|-----------------------|-----------------------|
| Microsoft 365 applications can access Dynamics 365 data by using existing connectors. | <input type="radio"/> | <input type="radio"/> |
| Microsoft Teams allows you to access customer information in Dynamics 365. | <input type="radio"/> | <input type="radio"/> |
| Power Platform allows you to build custom apps to automate processes in Dynamics 365. | <input type="radio"/> | <input type="radio"/> |

Correct Answer:

| | Yes | No |
|---|----------------------------------|-----------------------|
| Microsoft 365 applications can access Dynamics 365 data by using existing connectors. | <input checked="" type="radio"/> | <input type="radio"/> |
| Microsoft Teams allows you to access customer information in Dynamics 365. | <input checked="" type="radio"/> | <input type="radio"/> |
| Power Platform allows you to build custom apps to automate processes in Dynamics 365. | <input checked="" type="radio"/> | <input type="radio"/> |

Box 1: Yes The Microsoft Dataverse connector is used to connect to Dynamics 365 data

Box 2: Yes Microsoft Teams users get license-free access to Dynamics 365 data

Box 3: Yes The Microsoft Dataverse connector allows you to connect Power Platform to Dynamic 365 data

Reference: <https://docs.microsoft.com/en-us/power-platform/important-changes-coming#dynamics-365-connector-is-deprecated> <https://docs.microsoft.com/en-us/connectors/commondataserviceforapps/> <https://www.cigconsultants.com/post/microsoft-teams-users-get-license-free-access-to-dynamics-365-data>

QUESTION 5

HOTSPOT

To complete the sentence, select the appropriate option in the answer area.

Hot Area:

Answer Area

| |
|-------------------------|
| Resource groups |
| Management groups |
| Azure policies |
| Azure App Service plans |

provide organizations with the ability to manage the compliance of Azure resources across multiple subscriptions.

Correct Answer:

Answer Area

| |
|-------------------------|
| Resource groups |
| Management groups |
| Azure policies |
| Azure App Service plans |

provide organizations with the ability to manage the compliance of Azure resources across multiple subscriptions.
