**QUESTION 3**

The Client currently manages Customers, Inventory, and Product Information with dedicated backend systems as shown In the Systems Diagram below. There is also an external Email Marketing System (EMS) in place. The EMS needs order data toemail recommendations to customers using an existingemail campaign. These recommendations should be to only send for products that are in stock. The EMS has no access to the backend systems so this data should come from the Salesforce B2C Commerce site.

Which relationships should be added to the Systems Diagram to complete it and fulfill the requirements necessary for the email campaign?

- A. Order, Customer, and Product data should be exported from Staging. Inventory data should be exported from Production.
- B. Order, Customer, and Inventory data should be exported from Production. Product data should be exported from staging.
- C. Order and Customer data should be exported from Production. Product and Inventory data should be exported from Staging.
- D. Order and Inventory should be exported from Production. Products should be exported from Staging. Customers should be exported from the external Customer Management System.

Correct Answer: C

#### QUESTION 4

The Client wishes to implement a third party integration that allows for free shipping if the customer is a member of the third party service. When the customer's order is exported to the Order Management System (OMS) it also creates a custom object in order to track additional data before sending that order data to the third-party service as well.

What technical concern should the Architect raise to protect performance and stability of the site?

- A. The customer order quota and related retention or deletion needs.
- B. The customer's order data sent to a third-party and related security needs.
- C. The OMS having order data sent to a third party and related security needs.
- D. The custom object quota and related retention or deletion needs.
