**QUESTION 1**

A client has two B2C Commerce sites in the same instance: one for the U.S. market, the other for the European market. The product they make are sold with different safety certificates based on the world location.

For example, they sell a smartphone with certificate A in the U.S. and certificate B in Europe, a hairdryer with certificate C in the U.S. and certificate D in Europe, and more.

How should a developer allow the merchant to display the appropriate certification logo in the product details page, depending on the customer's location?

- A. Add a Localizable custom preference to the SitePreference system object type.
- B. Add a Site-specific custom attribute to the Product system object type.
- C. Add a Localizable custom attribute to the Certificate system object type.
- D. Add an Image custom preference to the SitePreference system object type.

Correct Answer: A

---

**QUESTION 2**

A developer has custom debug statements in a script, but the messages are not showing up in the Storefront Toolkit Request Log. Which step needs to be completed to get the messages to appear in the Request Log?

- A. In Custom Log Settings, activate the logging category at DEBUG level
- B. In Custom Log Settings, check the DEBUG box for Select Log Levels Written to Files
- C. In Site Preferences, check the box for Enable custom logging in Request Log
- D. In Global Preferences, check the box for Enable custom logging in Request Log

Correct Answer: B

#### QUESTION 4

Given the following ISML example, how should a developer reference the product object in the current iteration of the basket?

```
<isloop items="{pdict.Basket.products}" var="product"
status="loopstatus">
```

...

```
</isloop>
```

- A. loopstatus.product
- B. pdict.Basket.products[loopstatus]
- C. product
- D. pdict.product

Correct Answer: B

#### QUESTION 5

Given a B2C Commerce client with these specifics:

1.  
Sells in two different countries: US and IN
  2.  
Uses only the English language
- A developer has a requirement to add a new field to the IN registration form that must not appear in the US one.

Which path should be created to accomplish this requirement?

- A. cartridge/forms/profile\_en\_IN.xml

- B. cartridge/forms/profile\_in.xml
- C. cartridge/forms/in/profile.xml
- D. cartridge/forms/en\_IN/profile.xml

Correct Answer: D
