---

### QUESTION 4

Which WAN Optimization feature can accelerate the transfer of several similar, uncompressed files between two locations? (Two files are called similar, if their editing distance is small, compared to the size of the files. For example, if one file can be obtained from another one by inserting or deleting a small fragment.)

A. Protocol Optimization

B. Object Caching

C. Byte Caching

D. Bandwidth Management

Correct Answer: C

---

**QUESTION 5**

The default policy for ProxySG is DENY. Network administrator creates a VPM policy allowing access to some Web host only for certain users (see picture).

When installing this policy, ProxySG issues a warning that this rule will be ignored. What change can be applied in order to fix this?

- A. Add another rule to the Web Access layer creating an exception for users NOT allowed to access the host.
- B. Add another Web Access layer and set its default action to Allow.
- C. Add Web Authentication layer with a rule having Force Authenticate action.
- D. Add Web content layer with a rule preventing serving content from ProxySG cache to unauthorized users.

Correct Answer: C
