**QUESTION 1**

When analyzing an authentication error, which of these diagnostic tools provides the most detailed infor- mation about the protocol-level messages among the client, the ProxySG, and the authentication server?

A. Packet captures

B. Policy traces

C. Access logs

D. Event logs

Correct Answer: C

---

**QUESTION 2**

If cookie surrogates are used with a user agent that does not support cookies, how does the ProxySG re- spond?

A. The ProxySG repeatedly tries to authenticate until the user agent gives up, and authentication is not successful.

B. The ProxySG automatically switches to an IP surrogate and retries the authentication.

C. The answer depends on whether any other user agents share the same IP address.

D. This cannot happen; the ProxySG prevents such policy from being installed.

Correct Answer: B

---

**QUESTION 3**

Perl statements can be included into CPL code as part of policy processing.
