**QUESTION 1**

The MQ Administrator has enabled Command Events in order to log all successful MQSC commands. What else must be done to also capture the unauthorized MQSC command attempts?

- A. Enable Authority Events
- B. Enable Security Events
- C. Change the Authority Event setting from DISABLED to NODISPLAY
- D. Change the Command Event setting from DISABLED to NODISPLAY

Correct Answer: D

QUESTION 2

A business application has been removed from the mqm group but still has privileged authority through OAM access grants. The MQ administrator must delete the authorizations that grant administrative access to the queue manager while retaining those that do not.

Which access grant should the administrator retain?

- A. +crt on Queues
- B. +all on the Command Queue
- C. +chg on the Queue Manager
- D. +setall on the Default Model queue

Correct Answer: D

QUESTION 3

What must be done before an administrator can take a full backup of a queue manager's files?

- A. The queues must be cleared.
- B. The channels must be stopped.
- C. The queue manager must be stopped.
- D. The administrator must copy the logs over to DR site.

Correct Answer: C
