**QUESTION 1**

Which statement is true regarding IBM BPM's support of Swagger definitions for the REST APIs?

- A. There is no Swagger definition available for the REST API.
- B. The Swagger definition is only available for IBM BPM on Cloud installations.
- C. The Swagger definition is only available if the IBM BPM installation includes a web server that hosts the Swagger UL
- D. The Swagger definition is available via a REST API call or via a URL if the IBM BPM installation includes a web server that hosts the Swagger UL

Correct Answer: A

QUESTION 2

What does a developer need to do to view the artifacts and their dependencies that are used across all toolkits in the IBM Process Center repository?

- A. Get Administrative rights.
- B. Use the Global scope option.
- C. Use the POST /bpm/repo/projects REST API.
- D. Ensure that the Process Centers are registered to each other and enabled for sharing.

Correct Answer: B

QUESTION 3

When creating an External Service, how can a REST service be discovered?

- A. From an imported .ear file
- B. From a UDDI Service call
- C. From a local WSDL specification file
- D. From a local OpenAPI2.0 specification file

Correct Answer: C

QUESTION 4

Which statement is true about working with system data toolkits?

- A. The system data toolkit includes many predefined variable types.

- B. Administrative access is required to edit the library items in a system data toolkit.
- C. When a new process application is created, the system data toolkit needs to be added as a dependency.
- D. Adding a dependency on the system data toolkit allows the creation of custom, localized dashboards with the reusable interface elements.

Correct Answer: C

QUESTION 5

To change the state of an offline Process Server to online, a developer needs to set the heartBeatInterval to what value?

- A. equal to zero
- B. leave it empty
- C. less than zero
- D. greater than zero

Correct Answer: C
